Aldo Rossi and the Spirit of Architecture Diane Ghirardo, 2019-01-01 This beautifully illustrated book provides a crucial new look at Aldo Rossi's built work in relationship to his writings, drawings and product design and explores his contributions to the architecture in postwar Italy

Modern Architecture Through Case Studies 1945 to 1990 Peter Blundell Jones, Eamonn Canniffe, 2012-08-21 Once again new interpretations are presented of some of the most famous architecture of the period. Work by lesser known architects whose influence and role have been overlooked by conventional histories of the subject is discussed. The case study structure allows each example to be discussed and used as a springboard to explore different theoretical approaches. Filled with beautiful photographs, plans and architect's drawings, this is a clear and accessible discussion on a period of architecture that engages many questions still under debate in architecture today

Design Studio Works, Sketches & Essays Kyeong Jae Lee, 2015-02-19 I come from Seoul, Korea, where layers of ancient beauty and high-end technology coexist. The city has been evolving swiftly in ways that no single individual can fully comprehend and continues onward toward an exciting but unpredictable future. I have witnessed this change and have felt overwhelmed but inspired by this wild transformation. The pace of change has become a motivation for me to learn more, design more, and love more. If a city is a jigsaw puzzle, then creating architecture is like filling in the missing pieces without knowing what the entire picture should look like. I used to be afraid to make a mistake, thinking that a wrong move may stay and stain the beloved city for decades. But then I realized that adding a piece is not just a passive process but a mutually interactive one: the moment I make a move, it generates a new context. This revelation completely changed the way I see the world and emboldened me to be a more proactive, forward-thinking architect

Architectural Drawings as Investigating Devices Marianna Charitonidou, 2023-07-10 *Architectural Drawings as Investigating Devices* explores how the changing modes of representation in architecture and urbanism relate to the transformation of how the addressees of architecture and urbanism are conceived. The book diagnoses the dominant epistemological debates in architecture and urbanism during the 20th and 21st centuries. It traces their transformations, paying special attention to Le Corbusier and Ludwig Mies van der Rohe's preference for perspective representation, to the diagrams of Team 10 architects, to the critiques of functionalism and the upgrade of the artefactual value of architectural drawings in Aldo Rossi, John Hejduk, Peter Eisenman, and Oswald Mathias Ungers, and finally to the reinvention of architectural programme through the event in Bernard Tschumi and the Office for Metropolitan Architecture (OMA). Particular emphasis is placed on the spirit of truth and clarity in modernist architecture, the relationship between the individual and the community in the post-war era, architecture, the decodification of design process as syntactic analogy, and the paradigm of autonomy in the 1970s and 1980s, architecture, the concern about the dynamic character of urban conditions, and the

Diplomatic: Letter from the Architectural Enclave Jie Zhang, 2015-01-15 Seeing Architecture as a political art this book concerns itself with boundaries those of regimes of culture of law and of social strata In a silent crisis where sustained inscription of physical and social boundaries evacuates urban space into archipelagos of enclaves Architecture with only ambiguous claims of public space is rendered both an accomplice and a victim impotent against forces of capital and concerns of security Exposing the absurdities in urban geopolitics and persistent spatial logics of exclusivity is as important as proposing to hack into them Critical of the innocence of so called public space and the underlying architectural impasse the book offers an investigative commentary on the state of urban enclaves while speculating on alternative strategies by designing an embassy a bounded pseudo extraterritory and the epitome of an enclave Through absurd couplings and blatant image making a seemingly open US embassy is proposed for Beijing as an imploded fragment of a boundary its incompleteness buttressed by other territories of privilege and its disparate barriers articulated as a mechanism of filtration Away from popular strategies of conceptual and spatial blurring the book defines an architectural porosity to orchestrate spaces of varying openness as a nuanced response to both the embassy's double identities and schizophrenic agendas of city building With an architecture that is diplomatic by function and diplomatic by disposition one experiments with an agency beyond the single pursuit of publicness and an escape from the ideological enclave of positivism Ultimately the goal is to
