Writing Russian Lives Polly Jones,2018-09-14 Like many genres biography came belatedly to Russia As with other such late arrivals biography underwent intensive growth in quantity sophistication cultural significance and popularity from the era of Nicholas I onwards It stands today as a dominant force in post Soviet publishing Yet studies of Russian biography s poetics and its role as a literary and cultural institution in the nineteenth and twentieth centuries remain thin on the ground a fact often lamented yet not fully addressed in the scattered writings on the subject The present volume examines modern Russian biography as a literary form a publishing phenomenon and a cultural force that reveals and contests hegemonic ideas of the role of the individual in society and of the make up of the human personality itself **Alexander Blok** Avril Pyman,2014-05-16 Alexander Blok Selected Poems showcases the artistic nature of Blok through his poems The book first presents verses from the collection *Ante Lucem* and poems of the 1905 revolution Verses lifted from the two collections are presented The poems cover various topics and were accomplished in different time frames Although portions of the poems are only presented they have managed to illustrate the creative mind of Blok The text also highlights the works of Blok in English French German Italian and Russian An index of first lines and titles are also presented The book is a fine reference for students of poetry and researchers interested in the works and contributions of Blok in poetry **Twentieth-Century Russian Poetry** Katharine Hodgson,Joanne Shelton,Alexandra Smith,2017-04-21 The canon of Russian poetry has been reshaped since the fall of the Soviet Union A multi authored study of changing cultural memory and identity this revisionary work charts Russia s shifting relationship to its own literature in the face of social upheaval Literary canon and national identity are inextricably tied together the composition of a canon being the attempt to single out those literary works that

best express a nation's culture. This process is of course fluid and subject to significant shifts particularly at times of epochal change. This volume explores changes in the canon of twentieth century Russian poetry from the 1991 collapse of the Soviet Union to the end of Putin's second term as Russian President in 2008. In the wake of major institutional changes such as the abolition of state censorship and the introduction of a market economy the way was open for wholesale reinterpretation of twentieth century poets such as Iosif Brodskii, Anna Akhmatova and Osip Mandelstam their works and their lives. In the last twenty years many critics have discussed the possibility of various coexisting canons rooted in official and non official literature and suggested replacing the term Soviet literature with a new definition Russian literature of the Soviet period. Contributions to this volume explore the multiple factors involved in reshaping the canon understood as a body of literary texts given exemplary or representative status as classics. Among factors which may influence the composition of the canon are educational institutions, competing views of scholars and critics including figures outside Russia and the self canonising activity of poets themselves. Canon revision further reflects contemporary concerns with the destabilising effects of emigration and the internet and the desire to reconnect with pre revolutionary cultural traditions through a narrative of the past which foregrounds continuity. Despite persistent nostalgic yearnings in some quarters for a single canon the current situation is defiantly diverse balancing both the Soviet literary tradition and the parallel contemporaneous literary worlds of the emigration and the underground. Required reading for students, teachers and lovers of Russian literature. *Twentieth Century Russian Poetry* brings our understanding of post Soviet Russia up to date. **A Muse of Fire** Arnold D.

Harvey, 1998-01-01. This is the first book to relate to the literature and art of the First World War to the literature and art produced by the Second World War and by earlier wars. *A Muse of Fire* is also the first serious attempt to examine the whole range of war poetry and war fiction in English in its relation to the work of German, French, Italian and to a lesser extent Russian, Danish and Hungarian authors. Before 1914 few authors wrote about or experienced war. War especially its reality was not the proper subject of literature while writers seldom served in the armed forces and were almost never in battle. More than half this book deals with the First World War. In successive chapters A. D. Harvey discusses what sort of people in what sort of physical and psychological conditions wrote about the war or painted it, how they handled the challenge of describing their experiences with complete honesty, what literary and artistic techniques they employed, how other forms of creative talent were fostered by the war and how far memoirs of the war prepared the way for the next one. The account given of the Second World War in the final section like the chapters on pre 1914 war literature provides far more than simply an introduction and conclusion to the central part of the book. It is an important contribution to an understanding of how literature and art relate to the psychological and social structures of the communities within which they are produced. senselessness of violence He explores the tension between divine purpose and human agency questioning whether suffering serves any ultimate cosmic plan The narrative is not a definitive answer but rather an honest and deeply felt exploration of uncertainty highlighting the individual's struggle to find meaning and solace in the face of profound disillusionment This work resonates with philosophical inquiries into the problem of evil and the nature of religious faith echoing the concerns of thinkers like Søren Kierkegaard who explored the paradoxes of belief and the subjective nature of truth Letter to a Field Officer stands as a significant work within Tolstoy's early philosophical development moving beyond simple moralizing towards a more introspective and existential exploration of the human condition The novella's epistolary form allows for a deeply personal and vulnerable engagement with complex philosophical questions fostering a sense of intimacy and authenticity It reveals a critical turning point in Tolstoy's life and thought foreshadowing his later rejection of institutional religion and his embrace of a more radical non dogmatic spirituality Its enduring impact lies in its honest portrayal of spiritual doubt and the enduring human quest for meaning in a world marked by suffering and uncertainty

Beyond Symbolism and Surrealism Julia Friedman, 2010 Beyond Symbolism and Surrealism sheds light on the oeuvre of Alexei Remizov 1877-1957 a great modernist eccentric who has remained largely unknown to Western audiences Although his original prose garnered him early acclaim and has since entered the Russian literary canon Remizov's artistic capacity was fully realized only after his experimentation with words and images culminated in a writing process that relies as much on drawing as it does on language
