Point-of-Care Technologies Enabling Next-Generation Healthcare Monitoring and Management Sandeep Kumar Vashist, John H.T. Luong, 2019-02-20 This book describes the emerging point of care POC technologies that are paving the way to the next generation healthcare monitoring and management. It provides the readers with comprehensive up to date information about the emerging technologies such as smartphone based mobile healthcare technologies, smart devices, commercial personalized POC technologies, paper based immunoassays, IAs, lab on a chip, LOC based IAs and multiplex IAs. The book also provides guided insights into the POC diabetes management software and smart applications and the statistical determination of various bioanalytical parameters. Additionally, the authors discuss the future trends in POC technologies and personalized and integrated healthcare solutions for chronic diseases such as diabetes, stress, obesity and cardiovascular disorders. Each POC technology is described comprehensively and analyzed critically with its characteristic features, bioanalytical principles, applications, advantages, limitations and future trends. This book would be a very useful resource and teaching aid for professionals working in the field of POC technologies, in vitro diagnostics, IVD, mobile healthcare, Big Data, smart technology, software, smart applications, biomedical engineering, biosensors, personalized healthcare and other disciplines.
