Accumulating Insecurity Shelley Feldman, Charles C. Geisler, Gayatri A. Menon, 2011 *Accumulating Insecurity* examines the relationship between two vitally important contemporary phenomena a fixation on security that justifies global military engagements and the militarization of civilian life and the dramatic increase in day to day insecurity associated with contemporary crises in health care housing incarceration personal debt and unemployment Contributors to the volume explore how violence is used to maintain conditions for accumulating capital Across world regions violence is manifested in the increasingly strained often terrifying circumstances in which people struggle to socially reproduce themselves Security is often sought through armaments and containment which can lead to the impoverishment rather than the nourishment of laboring bodies Under increasingly precarious conditions governments oversee the movements of people rather than scrutinize and regulate the highly volatile movements of capital They often do so through practices that condone dispossession in the name of economic and political security

Accumulation by Dispossession and Local Livelihood Insecurity La Ring, 2018 Credit Constraints, Political Instability, and Capital Accumulation Risto Herrala, Rima Turk Ariss, 2013-12-16 We investigate the complex interactions between credit constraints political instability and capital accumulation using a novel approach based on Kiyotaki and Moore's 1997 theoretical framework Drawing on a unique firm level data set from Middle East and North Africa MENA empirical findings point to a large and significant effect of credit conditions on capital accumulation and suggest that continued political unrest worsens credit constraints The results support the view that financial development measured by a relaxing of financial constraints is key to macroeconomic development

Land Tenure Insecurity, Credit Rationing and Household Asset Accumulation Pedro V. Olinto, 1997 **Keynes's General Theory and Accumulation A.**

Asimakopulos, Athanasios Asimakopulos, 1991-06-28 This book makes Keynes's writing on his General Theory accessible to students by presenting this theory in a careful consistent manner that is faithful to the original Keynes's theory continues to

be important because the issues it raised such as the problems of involuntary unemployment the volatility of investment and the complexity of monetary arrangements in modern capitalist economies are still with us Keynes s method of analysis which tries to allow for the complications of dealing with historical time deserves the careful attention given in this book Keynes s formal analysis dealt only with a short period of time during which changes in productive capacity as a result of net investment were small relative to initial productive capacity Roy Harrod and Joan Robinson were the two most prominent followers of Keynes who attempted to extend his analysis to the long period by allowing for the effects of investment on productive capacity as well as on effective demand The careful examination of their writings on this topic is a natural complement to the presentation of Keynes s General Theory and makes clear the severe limitations on any use of equilibrium concepts in dealing with accumulation in models that try to observe Keynes s warnings about an unknowable future in the type of world we inhabit

Africa and the Global System of Capital Accumulation Emmanuel O Oritsejafor, Allan D. Cooper, 2021-04-17 Africa and the Global System of Capital Accumulation offers a groundbreaking analysis of the strategic role Africa plays in the global capitalist economy The exploitation of Africa s rich resources as well as its labor make it possible for major world powers to sustain their authority over their own middle class populations while rewarding African collaborators in leadership positions for subjecting their populations into poverty and desperation Middle class obsessions such as computers mobile phones cars and the petroleum that fuels them diamonds chocolate all of these products require African resources that are typically obtained by child or slave labor that helps to generate billionaires out of foreign investors while impoverishing most Africans Oritsejafor and Cooper demonstrate that primitive accumulation believed by both Adam Smith and Karl Marx to be a process that precedes capitalism is actually an integral part of capitalism They also validate the thesis that capitalism incorporates racism as an organizing tool for the exploitation of labor in Africa and on a global scale Case studies are presented on Nigeria Cote d Ivoire Ghana Liberia Congo Tanzania Somalia Angola Namibia Sao Tome and Principe and South Sudan There are also chapters analyzing the interests of Russia and China in Africa This book will be of interest to students and scholars of African politics development and economics

Liberalization, Financial Instability and Economic Development Yılmaz Akyüz, 2014-05-01 Weighing up the costs and benefits of economic interdependence in a finance driven world this book argues that globalization understood and promoted as absolute freedom for all forms of capital has been oversold to the Global South and that the South should be as selective about globalization as the North Liberalization Financial Instability and Economic Development challenges the orthodoxy on the link between financial deepening and economic growth as well as that between the efficiency of financial markets and the benefits of liberalization Ultimately the author urges developing countries to control capital flows and asset bubbles preventing financial fragility and crises and recommends regional policy options for managing capital flows and exchange rates

Non-State Challenges in a Re-Ordered World Stefano Ruzza, Anja P Jakobi, Charles Geisler, 2015-10-14 There is a sprawling scholarship on violence crime and corrupt state rule yet few have interpreted these challenges as transformative at the global scale and as a potential source of alternative non state legitimacy This volume challenges Westphalian conservatism in a provocative yet plausible manner shedding light at the ubiquity and diversity of unfolding non state agendas and at their effect on the imagined state community Focusing on civil war parties warlords commercial providers of security multinational companies and criminal organizations the book directs attention to theoretical questions and policy challenges arising from non state armed expansion To accomplish this the contributors present a range of case studies and comparisons within three thematic sections the first takes stock of how when and in what measure state and state system legitimacy are challenged by non state violent or criminal activity the second addresses the nature effectiveness and side effects of different state mandated reaction to non state activities and third focuses on the recombination of state and non state actors contributing to processes of socio political transformation This volume provides a current analysis of different armed and violent actors encroaching on the state s monopoly of violence It seeks to spark debate about global political change and will be of interest to students and scholars of global governance global security and international relations

Fast Transverse Beam Instability Caused by Electron Cloud Trapped in Combined Function Magnets Sergey A. Antipov,2018-11-01 This thesis presents profound insights into the origins and dynamics of beam instabilities using both experimental observations and numerical simulations When the Recycler Ring a high intensity proton beam accelerator at Fermi National Accelerator Laboratory was commissioned it became evident that the Recycler beam experiences a very fast instability of unknown nature This instability was so fast that the existing dampers were ineffective at suppressing it The nature of this phenomenon alongside several other poorly understood features of the beam became one of the biggest puzzles in the accelerator community The author investigated a hypothesis that the instability arises from an interaction with a dense cloud of electrons accompanying the proton beam He studied the phenomena experimentally by comparing the dynamics of stable and unstable beams by numerically simulating the build up of the electron cloud and its interaction with the beam and by constructing an analytical model of an electron cloud driven instability with the electrons trapped in combined function dipole magnets He has devised a method to stabilize the beam by a clearing bunch which conclusively revealed that the instability is caused by the electron cloud trapped in a strong magnetic field Finally he conducted measurements of the microwave propagation through a single dipole magnet These measurements have confirmed the presence of the electron cloud in combined function magnets
