Lifestyle and Medicine in the Enlightenment James

Kennaway, Rina Knoeff, 2020-03-09 The biggest challenges in public health today are often related to attitudes diet and exercise In many ways this marks a return to the state of medicine in the eighteenth century when ideals of healthy living were a much more central part of the European consciousness than they have become since the advent of modern clinical medicine Enlightenment advice on healthy lifestyle was often still discussed in terms of the six non naturals airs and places food and drink exercise excretion and retention and sleep and emotions This volume examines what it meant to live healthily in the Enlightenment in the context of those non naturals showing both the profound continuities from Antiquity and the impact of newer conceptions of the body Chapter 8 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com/books/e/9780429465642>

The Effects of Weather Conditions on the Frequency and Severity of Migraine Headaches in Southwestern Ontario [microform] Alan Stewart Nursall, 1981 Historical records consistently illustrate the importance that man has attached to the impacts of weather on health It was not until recently however that objective scientific analyses of this relationship were attempted In this study one small aspect of this medico meteorological relationship was examined the effects of various weather conditions on the incidence of migraine headaches in southwestern Ontario Weather is commonly mentioned by migraine sufferers as a factor that seems to trigger the onset of attacks The particular atmospheric conditions that are most frequently cited are falling barometric pressure chill winds glare thunderstorms extremes of heat or cold and specific local winds such as the European Foehn and the Israeli Sharav This study was conducted in the Toronto region of southwestern Ontario using 91 volunteers who kept detailed records of their migraine attacks for a period of nine months April to December 1979 The migraine data were then compared with 11 different weather parameters atmospheric pressure the rate of change of pressure temperature the rate of change of temperature wind speed wind direction precipitation thunderstorms air pollution humidex and a type of synoptic weather classification weather phases Day of the week was also examined The results indicated that the passage of warm fronts through the Toronto area and the warm tropical air that follows those fronts provoke a significant increase in both the frequency and severity of migraine Excessive heat and humidity were also associated with a marked increase in migraine frequency Most parameters however yielded no significant results and likely have no noteworthy impact on migraine The relationship between migraine and atmospheric pressure was examined further in an informal and subjective inquiry into the frequency of migraine attacks during airplane flights Changes

in pressure only seemed to be of significance when they were of large magnitude and happened quickly Possible causal mechanisms in the effects of weather on migraine are discussed Migraine attacks resulting from weather are probably the result of both physiological and psychological stress imposed by unfavourable weather conditions The physiological stress may be mediated by serotonin a hormone central to both migraine and thermoregulation but this is unsubstantiated The following report also includes an introduction to human biometeorology and an overview of the mechanisms involved in migraine The concept of weather phases is described in detail [The Effect of Weather on Migraine Headache](#) Patricia Birgeneau Prince,2001 *Migraine Notebook* Lime Journals,2019-11-04 The 100 page migraine notebook has space to record medical contacts date time weather temperature migraine duration hours of sleep trigger warning signs what i ate today and medication Gifts for migraine sufferer and headaches to list trigger food weather and pain relief [Migraine Diary](#) Lime Journals,2019-11-04 Keep record and track of migraine headache symptoms list trigger foods duration pain scale pain relief treatment and medication The 100 page migraine diary log has space for medical contacts type of pain date and time what food you eat medication warning signs A perfect gift for migraine sufferers headaches and nurses **The Aetiology and Prophylaxis of Migraine in Relation to Weather and Psychological Factors** James David Gomersall,University of Aberdeen,1973 **Migraine Log** Lime Journals,2019-11-04 Track and migraine list trigger food weather and temperature medical contacts hours of sleep duration and medication that helped The migraine log has a pain scale to help you track your health better Amazing gift for headaches and migraine sufferers this holiday or their birthday It doesn't matter whether your migraine is from stress pregnancy food weather neck pain allergies drinking or driving this book is yours *The Effects of Weather on the Frequency and Severity of Migraine Headaches in Southwestern Ontario* Alan Stewart Nursall,David W. Migraines and Dreams Altan Loker,2003 The method of scientific investigation used in this book and explained in its first chapter is the method described by Isaac Newton in his book The Principia which is continually used by him and all other physicists but not by psychologists The great truth exposed by using this method to understand migraine is that the head pain and the associated symptoms are automatic responses created by evolution and controlled unconsciously to realize self protection and survival This fact is also derived from Freud s and Jung s works by using Newton s method It is also shown that the results of research on the physiological processes that are related to the production of headache do not make the above etiology impossible but rather suggest it A migraineur has a problem that harms his her interests seriously but he she does not deal with it adequately for various reasons and represses it in some measure His her unconscious produces symptoms that carry analogic messages urging him her to resolve that problem and also punish him her for not doing that Sometimes a symptom is so timely and intense that it prevents a self harming action Thus headache means Get wise stop making that mistake stop hurting yourself Eye pain means Don t ignore the events that hurt you Nausea and vomiting mean Don t tolerate ugly events The other symptoms too carry self protective messages related to the patient s life experiences Psychotherapy consists of making a patient consciously understand and deal adequately with the problem that his her unconscious wishes him her to resolve so that the symptoms become unneeded as message carriers Evidently this method necessitates cooperation with the unconscious whereas all existing therapies combat its products i e the symptoms and thereby make the symptoms all the

more needed A migraineur can do this work with or without the help of a therapist who is familiar with this method Dreams too are automatic responses that serve to realize self protection and survival and carry more diagnostic and therapeutic information and ideas compared to symptoms Also dreams can be induced that deal with consciously chosen issues Therefore symptoms and dreams are interpreted together as explained in this book This theory predicts a patients relevant life experiences in general terms facilitates the discovery of their particulars explains the causes meanings and functions of his her symptoms and dreams and realizes very fast and definitive cures More than 120 headache and facial pain sufferers have been cured in very short times using this method as illustrated by 50 original case histories This book is published for the use of headache patients and their therapists and contains the relevant chapters of my earlier book COGNITIVE BEHAVIORAL CYBERNETICS OF SYMPTOMS DREAMS LATERALIZATION THEORY INTERPRETATION THERAPY This earlier book exposes the adaptive and self protective functions of the most conspicuous automatic responses such as pain fear anxiety repression all symptoms of primary mental disorders response to stage and screen plays laughter and tears structural responses such as cerebral lateralization and so forth The fact that all those phenomena can be explained predicted and controlled on the basis of the same principles proves that those principles reflect the truth *Migraines: Migraine Triggers* Adams Media,2012-04-16 Do you or a loved one suffer from migraines The Everything Healthy Living Series is here to help These concise thoughtful guides offer the expert advice and the latest medical information you need to manage your pain and lead a healthy life Identifying different triggers like alcohol food weather or environmental factors can dramatically reduce the frequency of your migraines Living with migraines can be challenging but with the right guidance you can live a happy and healthy life *The ^AWoman's Guide to Managing Migraine* Susan Hutchinson MD,2013-01-30 Hormones and migraine are intimately connected Ten million women in the US suffer from migraine associated with hormones but they may not know it This concise and practical handbook equips female headache sufferers with all the tools they need in conjunction with their healthcare providers to properly diagnose types of headache and develop the best possible treatment plans Headache specialist family practice physician and fellow migraine sufferer Dr Hutchinson explores common associated conditions hormonal therapy preventive strategies and treatment options from the most promising new drugs to the most effective complementary and alternative therapies This book empowers migraine sufferers to take charge of their treatment and find the path to living well **Migraine Tracker** Memoris Publishing,2020-09-03 There are several different kinds of headaches and each one appears to have its own triggers symptoms and options for treatment Different headaches are also associated with specific locations in your neck and head Our Migraine journals helps you to accurately record and track all triggers symptoms patterns and most effective treatment options This journal comes in a portable size to keep in your pocket briefcase or handbag to carry with you wherever you go Product Details Portable size 6 x 9 15 24 x 22 86cm Undated Location Time Started Time Ended Duration Severity of Headache Migraine Triggers Relief Measures Weather Other
