The Great River Boyce Upholt, 2024-06-11 Instant Bestseller Winner of the 2024 Willie Morris Award for Southern Nonfiction A Chicago Public Library Must Read Book of 2024 A Booklist Editors Choice A sweeping history of the Mississippi River and the centuries of human meddling that have transformed both it and America The Mississippi River lies at the heart of America an undeniable

life force that is intertwined with the nation's culture and history. Its watershed spans almost half the country. Mark Twain's travels on the river inspired our first national literature and jazz and blues were born in its floodplains and carried upstream. In this landmark work of natural history, Boyce Upholt tells the epic story of this wild and unruly river and the centuries of efforts to control it. Over thousands of years, the Mississippi watershed was home to millions of Indigenous people who regarded the great river with awe and respect, adorning its banks with astonishing spiritual earthworks. The river was ever changing and Indigenous tribes embraced and even depended on its regular flooding. But the expanse of the watershed and the rich soils of its floodplain lured European settlers and American pioneers who had a different vision: the river was a foe to conquer. Centuries of human attempts to own, contain, and rework the Mississippi River, from Thomas Jefferson's expansionist land hunger through today's era of environmental concern, have now transformed its landscape. Upholt reveals how an ambitious and sometimes contentious program of engineering government built levees, jetties, dikes, and dams, has not only damaged once vibrant ecosystems but may not work much longer. Carrying readers along the river's last remaining backchannels, he explores how scientists are now hoping to restore what has been lost. Rich and powerful, *The Great River* delivers a startling account of what happens when we try to fight against nature instead of acknowledging and embracing its power, a lesson that is all too relevant in our rapidly changing world.

The book will be a valuable resource for academics, students, and practitioners working in the areas of international private law, electronic commerce law, and consumer law.

The cosmos and with it the solar system through its physical interaction shapes the fate of the inhabitants of the Earth and their civilization. I have described this in my publications available on OPEN ACCESS on the Internet and in the following book I confirm it once again. Physicochemical processes including climatic processes of our planet's environment are controlled by the closer and further influence of the space environment. The changing physicochemical environments including climate changes of our planet influencing biological creatures to shape the evolving culture of human civilizations. The defective view of the world promoted in the era of exposing the biological of the human mind contained in the statement being shapes consciousness is supplemented by And consciousness shapes being. The evolution of human knowledge supported recently by information resources stored on the Internet allows us to conclude that the universe is filled with a life shaped by the cosmos and in response the evolution of biological life shapes the cosmic environment. This sentence being shapes consciousness and consciousness shapes being contains my concept of the functioning of the constantly renewing cosmic environment in which the evolution of biological beings is inscribed. The end of the evolution of biological beings is the creation of a virtual environment in which a new star system will be created giving life to a virtual biological environment so that energy can be reproduced. The world is composed of interpenetrating and interacting parallel virtual realities that create the energy resources of the Universe. In the first part of the book entitled *The Solar System shapes the climate of the Earth* 7 I describe how the interactions of the Solar System and the Milky Way shape the Earth's climate and the Earth's lithosphere. In the second part of the book entitled *The civilization results of climate change* 120 I describe how climate change is shaping Earth's cultural systems as human knowledge unfolds. It is necessary to return to the knowledge and beliefs of antiquity to understand the modern world and reconcile different nations. Only peace and reconciliation between people are capable of ensuring the further fruitful evolution of the world. In the last third part of the book entitled *The Third Way between capitalism and communism* 389 I described the actions that need to be taken for the human world to turn into a harmonious environment enabling the realization of the goal of our evolution: restoring the energy that gave us life, i.e. recreating the virtual solar system and life in it.
