Tornado God Peter J. Thuesen, 2020 One of the earliest sources of humanity's religious impulse was severe weather which ancient peoples attributed to the wrath of storm gods Enlightenment thinkers derided such beliefs as superstition but in America scientific and theological hubris came face to face with the tornado nature's most violent windstorm In this groundbreaking history Peter J Thuesen traces the primal connections between weather and religion in the United States He shows that tornadoes and other storms have repeatedly drawn Americans into the profoundest of religious mysteries and confronted them with the question of their own destiny how much is self determined and how much is beyond human understanding or control *First Step*

Weather Services for the Nation National Research Council,Division on Earth and Life Studies,Board on Atmospheric Sciences and Climate,Committee on the Assessment of the National Weather Service's Modernization Program,2012-11-02 During the 1980s and 1990s the National Weather Service NWS undertook a major program called the Modernization and Associated Restructuring MAR The MAR was officially completed in 2000 No comprehensive assessment of the execution of the MAR plan or comparison of the promised benefits of the MAR to its actual impact had ever been conducted Therefore Congress asked the National Academy of Sciences to conduct an end to end assessment That report The National Weather Service Modernization and Associated Restructuring A Retrospective Assessment concluded that the MAR was a success Now twelve years after the official completion of the MAR the challenges faced by the NWS are no less important than those of the pre MAR era The three key challenges are 1 Keeping Pace with accelerating scientific and technological advancement 2 Meeting Expanding and Evolving User Needs in an increasingly information centric society and 3 Partnering with an Increasingly Capable Enterprise that has grown considerably since the time of the MAR Weather Services for the Nation presents three main recommendations for responding to these challenges These recommendations will help the NWS address these challenges making it more agile and effective This will put it on a path to becoming second to none at integrating advances in science and technology into its operations and at meeting user needs leading in some areas and keeping pace in others It will have the highest quality core capabilities among national weather services It will have a more agile organizational structure and workforce that allow it to directly or indirectly reach more end users save more lives and help more businesses And it will have leveraged these capabilities through the broader enterprise This approach will make possible societal benefits beyond what the NWS budget alone allows

the Sunbelt over the twentieth century Uniquely wide ranging in scale from the city's variegated neighborhoods up to its place in regional and national political economies this book reinterprets the fall of Jim Crow as a democratization born of two metropolitan movements a well known one for civil rights and a lesser known one on behalf of the environment Arising out of Atlanta's Black and white middle classes respectively both movements owed much to New Deal capitalism's undermining of concentrated wealth and power if not racial segregation in the Jim Crow South Placing these two movements on the same historical page Christopher C Sellers spotlights those environmental inequities ideals and provocations that catalyzed their divergent political projects He then follows the intermittent sometimes vital alliances they struck as civil rights activists tackled poverty as a new environmental state arose and as Black politicians began winning elections Into the 1980s as a wealth concentrating style of capitalism returned to the city and Atlanta became a national poster child for sprawl the seedbeds spread both for a national environmental justice movement and for an influential new style of antistatism Sellers contends that this new conservatism sweeping the South with an antienvironmentalism and budding white nationalism that echoed the region's Jim Crow past once again challenged the democracy Atlantans had achieved *Que's Official Internet Yellow Pages* Joe Kraynak,2005 Information online is not stored or organized in any logical fashion but this reference attempts to organize and catalog a small portion of the Web in a single resource of the best sites in each category **Homo Ecophagus** Warren M. Impacts Threats Consequences of Global Warming and Remedies to the Global Warming *Integrating Social and Behavioral Sciences Within the Weather Enterprise* National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Board on Human-Systems Integration, Board on Environmental Change and Society, Board on Atmospheric Sciences and Climate, Committee on Advancing Social and Behavioral Science Research and Application Within the Weather Enterprise, 2018-02-05 Our ability to observe and forecast severe weather events has improved markedly over the past few decades. Forecasts of snow and ice storms, hurricanes, and storm surge, extreme heat, and other severe weather events are made with greater accuracy, geographic specificity, and lead time to allow people and communities to take appropriate protective measures. Yet hazardous weather continues to cause loss of life and result in other preventable social costs. There is growing recognition that a host of social and behavioral factors affect how we prepare for, observe, predict, respond to, and are impacted by weather hazards. For example, an individual's response to a severe weather event may depend on their understanding of the forecast, prior experience with severe weather, concerns about their other family members or property, their capacity to take the recommended protective actions, and numerous other factors. Indeed, it is these factors that can determine whether or not a potential hazard becomes an actual disaster. Thus, it is essential to bring to bear expertise in the social and behavioral sciences (SBS), including disciplines such as anthropology, communication, demography, economics, geography, political science, psychology, and sociology, to understand how people's knowledge, experiences, perceptions, and attitudes shape their responses to weather risks and to understand how human cognitive and social dynamics affect the forecast process itself. *Integrating Social and Behavioral Sciences Within the Weather Enterprise* explores and provides guidance on the challenges of integrating social and behavioral sciences within the weather enterprise. It assesses current SBS activities, describes the potential value of improved integration of SBS, and barriers that impede this integration. It develops a research agenda and identifies infrastructural and institutional arrangements for successfully pursuing SBS weather research and the transfer of relevant findings to operational settings.
