translates to trust employees who feel supported and well trained for the job are more likely to trust their supervisors than those who report being subject to constant monitoring and a strict hierarchy Managers who stand up for employees to media government and other agency officials are particularly effective in cultivating the trust of their workers And trust the authors find motivates superior job performance and commitment to the agency s mission Employees who trust their supervisors report that they work harder put in longer hours and are less likely to break rules The authors extend these findings to show that once supervisors gain trust they enjoy greater latitude in influencing how employees allocate their time while working Brehm and Gates show how these three executive roles are interrelated training and protection for employees gives rise to trust which provides supervisors with the leverage to stimulate improved performance among their workers This new model which frames supervisors as teachers and protectors instead of taskmasters has widespread implications for training a new generation of leaders and creating more efficient organizations Bureaucracies are notorious for inefficiency but mid level supervisors who are often regarded as powerless retain tremendous power to build a more productive workforce Teaching Tasks and Trust provides a fascinating glimpse into a bureaucratic world operating below the radar of the public eye a world we rarely see while waiting in line or filling out paperwork A Volume in the Russell Sage Foundation Series on Trust
