Handbook of Test Development Suzanne Lane, Mark R. Raymond, Thomas M. Haladyna, 2015-10-08 The second edition of the Handbook of Test Development provides graduate students and professionals with an up to date research oriented guide to the latest developments in the field Including thirty two chapters by well known scholars and practitioners it is divided into five sections covering the foundations of test development content definition item development test design and form assembly and the processes of test administration documentation and evaluation Keenly aware of developments in the field since the publication of the first edition including changes in technology the evolution of psychometric theory and the increased demands for effective tests via educational policy the editors of this edition include new chapters on assessing noncognitive skills measuring growth and learning progressions automated item generation and test assembly and computerized scoring of constructed responses The volume also includes expanded coverage of

performance testing validity fairness and numerous other topics Edited by Suzanne Lane Mark R Raymond and Thomas M Haladyna *The Handbook of Test Development* 2nd edition is based on the revised Standards for Educational and Psychological Testing and is appropriate for graduate courses and seminars that deal with test development and usage professional testing services and credentialing agencies state and local boards of education and academic libraries serving these groups      *Advanced Methods in Automatic Item Generation* Mark J. Gierl, Hollis Lai, Vasily Tanygin, 2021-05-18

*Advanced Methods in Automatic Item Generation* is an up to date survey of the growing research on automatic item generation AIG in today s technology enhanced educational measurement sector As test administration procedures increasingly integrate digital media and Internet use assessment stakeholders from graduate students to scholars to industry professionals have numerous opportunities to study and create different types of tests and test items This comprehensive analysis offers thorough coverage of the theoretical foundations and concepts that define AIG as well as the practical considerations required to produce and apply large numbers of useful test items      *75 Years Aloft: Royal Australian Air Force Air Training Corps: Australian Air Force Cadets, 1941-2016* Matthew Glozier, 2015-12-03 This book celebrates 75 years of Air Force cadet activity in Australia 1941 2016 The organisation has had a tremendous impact upon the lives of tens of thousands of Australians over our 75 year history Since 1982 it has enhanced the lives of young women as well as men The book begins in WWII with the need to pre train capable and committed keen lads Over 30 000 Australian boys were air cadets 1941 1945 with almost 13 000 going on to active service in the war Air Force cadets survived into peacetime to become an aviation focussed youth development organisation providing flying training in a military atmosphere with the aim of inspiring cadets to join the RAAF There are currently over 8 000 Air Force cadets and adult staff around Australia Aviation centred youth development in a RAAF service environment remains our central focus      Prof. Izhar, 2015-08-09

*Advancing Human Assessment* Randy E. Bennett, Matthias von Davier, 2017-10-17 This book is open access under a CC BY NC 2 5 license This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world s leading research institutions Educational Testing Service The book s four major sections detail research and development in measurement and statistics education policy analysis and evaluation scientific psychology and validity Many of the developments presented have become de facto standards in educational and psychological measurement including in item response theory IRT linking and equating differential item functioning DIF and educational surveys like the National Assessment of Educational Progress NAEP the Programme of international Student Assessment PISA the Progress of International Reading Literacy Study PIRLS and the Trends in Mathematics and Science Study TIMSS In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics the book gives significant attention to ETS work in cognitive personality developmental and social psychology and to education policy analysis and program evaluation The chapter authors are long standing experts

who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement evaluation scientific psychology and education policy analysis Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70 year history the book is a useful resource for all interested in the improvement of human assessment

**Automatic Item Generation** Mark J. Gierl, Thomas M. Haladyna, 2013 Automatic item generation AIG represents a relatively new and unique research area where specific cognitive and psychometric theories are applied to test construction practices for the purpose of producing test items using technology The purpose of this book is to bring researchers and practitioners up to date on the growing body of research on AIG by organizing in one volume what is currently known about this research area Part I begins with an overview of the concepts and topics necessary for understanding AIG by focusing on both its history and current applications Part II presents two theoretical frameworks and practical applications of these frameworks in the production of item generation Part III summarizes the psychological and substantive characteristics of generated items Part IV concludes with a discussion of the statistical models that can be used to estimate the item characteristics of generated items features one future application of AIG describes the current technologies used for AIG and also highlights the unresolved issues that must be addressed as AIG continues to mature as a research area Comprehensive The book provides a comprehensive analysis of both the theoretical concepts that define automatic item generation and the practical considerations required to implement these concepts Varied Applications Readers are provided with novel applications in diverse content areas e g science and reading comprehension that range across all educational levels elementary through university
