Small Business Sourcebook ,2007-12 Source Book of American Architecture G.E. Kidder Smith,2000-09 This comprehensive and insightful illustrated survey of 500 of America s most distinguished buildings provides a unique overview of the thousand year architectural development of the United States It examines our nation s architecture from its earliest days to the present ranging from cliff dwellings in Mesa Verde to Frank Lloyd Wright s Robie House in Chicago to James Ingo Freed s Holocaust Museum in Washington Indispensable in any library it also serves as a general introduction to American architecture or as a splendid guide for tourists *Pi: A Source Book* J.L. Berggren,Jonathan Borwein,Peter Borwein,2014-01-13 This book documents the history of pi from the dawn of mathematical time to the present One of the beauties of the literature on pi is that it allows for the inclusion of very modern yet accessible mathematics The articles on pi collected herein include selections from the mathematical and computational literature over four millennia a variety of historical studies on the cultural significance of the number and an assortment of anecdotal fanciful and simply amusing pieces For this new edition the authors have updated the original material while adding new material of historical and cultural interest There is a substantial exposition of the recent history of the computation of digits of pi a discussion of the normality of the distribution of the digits new translations of works by Viete and Huygen as well as Kaplansky s never before published Song of Pi From the reviews of earlier editions Few mathematics books serve a wider potential readership than does a source book and this particular one is admirably designed to cater for a broad spectrum of tastes professional mathematicians with research interest in related subjects historians of mathematics teachers at all levels searching out material for individual talks and student projects and amateurs who will find much to amuse and inform them in this leafy tome The authors are to be congratulated on their good taste in preparing such a rich and varied banquet with which to celebrate pi Roger Webster for the Bulletin of the LMS The judicious representative selection makes this a useful addition to one s library as a reference book an enjoyable survey of developments and a source of elegant and deep mathematics of different eras Ed Barbeau for MathSciNet Full of useful formulas and ideas it is a vast source of inspiration to any mathematician A level and upwards a necessity in any maths library New Scientist **Pi: A Source Book** Jonathan M. Borwein,2013-06-29 Our intention in this collection is to provide largely through original writings an ex tended account of pi

from the dawn of mathematical time to the present The story of pi reflects the most seminal the most serious and sometimes the most whimsical aspects of mathematics A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject It has been a part of human culture and the educated imagination for more than twenty five hundred years The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry analysis and special functions numerical analysis algebra and number theory It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development Why a Source Book Few books serve wider potential audiences than does a source book To our knowledge there is at present no easy access to the bulk of the material we have collected
