Beyond Legal Reasoning: a Critique of Pure Lawyering Jeffrey Lipshaw,2017-03-27 The concept of learning to think like a lawyer is one of the cornerstones of legal education in the United States and beyond In this book Jeffrey Lipshaw provides a critique of the traditional views of thinking like a lawyer or pure lawyering aimed at lawyers law professors and students who want to understand lawyering beyond the traditional warrior metaphor Drawing on his extensive experience at the intersection of real world law and business issues Professor Lipshaw presents a sophisticated philosophical argument that the pure lawyering of traditional legal education is agnostic to either truth or moral value of outcomes He demonstrates pure lawyering s potential both for illusions of certainty and cynical instrumentalism and the consequences of both when lawyers are called on as dealmakers policymakers and counsellors This book offers an avenue for getting beyond or unlearning merely how to think like a lawyer It combines legal theory philosophy of knowledge and doctrine with an appreciation of real life judgment calls that multi disciplinary lawyers are called upon to make The book will be of great interest to scholars of legal education legal language and reasoning as well as professors who teach both doctrine and thinking and writing skills in the first year law school curriculum and for anyone who is interested in seeking a perspective on thinking like a lawyer beyond the litigation arena

Analytical Corporate Valuation

Pasquale De Luca,2018-10-31 This book integrates the models employed in the fundamental analysis of a company with the models used by investors in the capital markets to

diversify risks and maximize expected returns The underlying thesis is that the company creates value only if the return on capital invested exceeds the cost of capital while the objective is to demonstrate how integration of the fields of corporate finance and asset pricing enables comprehensive and accurate company valuation Companies can thrive only if they are able to create value for shareholders over time A company's value creation and the correct approach to its measurement require two main skills first the ability to analyze and evaluate the company's fundamentals with respect to its business model and its performance over time and second knowledge of investors' models with regard to risk diversification and return maximization from which the cost of capital for the firm is derived Based on this perspective the book combines rigorous quantitative analysis with effective use of graphics to aid intuitive understanding

The Meaning of Shared Value Paolo Ricci, Patrick O'Sullivan, Floriana Fusco, 2023-06-20 The concept of Creating Shared Value CSV creating economic value in a way that also creates value for the whole of society has risen in prominence as a corporate policy and a strategy in recent years mainly for third sector or development organisations However while it has received considerable interest among business leaders and practitioners it has also sparked a bitter debate among academics proponents and sceptics of the idea Starting from this argument the book develops a meta critical examination of the hidden presuppositions of both supporters and critics of Creating Shared Value particular in relation to the concept of value It is argued that there are not two separate types of value i.e. an economic value and a social value but only a unique one which essentially means the creation of well being If anything the distinction that is drawn relates to the value capture how the value created is distributed among different stakeholders and not to value creation additions to potential well being since the notion of value itself is univocal Behind the debate are two implicit opposed viewpoints on the philosophy of history an antagonistic pessimistic and a cooperative optimistic view The authors are thus led to a discussion of which of the two visions appears to be the most rational in today's world The book is addressed to readers with an interest in the core concept of value primarily in economics strategic management and philosophy
