Human Population and the Case for Global Warming Clay Sherrod, 2019-07-23 Massive country sized glaciers fall magnificently into the polar waters around them one by one eroding the great masses of ice that we have come to know as polar caps of Earth Great shelves of prehistory in frozen state are finally giving way to the warming blanket of air surrounding our planet the results of which are going to be catastrophic for future generations of all living things The cause of the glacial erosion is very simple human population explosion and the results of human demand and consumption Today it is likely to be unstoppable The nonsensical going green movement should have begun in the early 1960 s when scientists first sounded the alarm about this potential global disaster suggesting even more ludicrous plans such as The Green New Deal is nothing but political rhetoric it is not a solution only diversion from a solution In fact the problem is so large that possibly no effort short of the elimination of the human specie will stop the cycle *Commerce, Justice, Science, and Related Agencies Appropriations for 2018* United States. Kneeland,2021-05-25 On Friday January 28 1977 it began to snow in Buffalo The second largest city in New York State located directly in line with the Great Lakes snowbelt was no stranger to this kind of winter weather With their city averaging ninety four inches of snow per year the citizens of Buffalo knew how to survive a snowstorm But the blizzard that engulfed the city for the next four days was about to make history Between the subzero wind chill and whiteout conditions hundreds of people were trapped when the snow began to fall Twenty to thirty foot high snow drifts isolated residents in their offices and homes and even in their cars on the highway With a dependency on rubber tire vehicles which lost all traction in the heavily blanketed urban streets they were cut off from food fuel and even electricity This one unexpected snow disaster stranded tens of thousands of people froze public utilities and transportation and cost Buffalo hundreds of millions of dollars in economic losses and property damages The destruction wrought by this snowstorm like the destruction brought on by other natural disasters was from a

combination of weather related hazards and the public policies meant to mitigate them Buffalo s 1977 blizzard the first snowstorm to be declared a disaster in US history came after a century of automobility suburbanization and snow removal guidelines like the bare pavement policy Kneeland offers a compelling examination of whether the 1977 storm was an anomaly or the inevitable outcome of years of city planning From the local to the state and federal levels Kneeland discusses governmental response and disaster relief showing how this regional event had national implications for environmental policy and how its effects have resounded through the complexities of disaster politics long after the snow fell **Editor & Publisher** ,1998 **Gale Directory of Publications and Broadcast Media** Kristin B.
