## **Land Use Planning:**

*Dutch Land-use Planning* Prof Dr Barrie Needham, 2014-03-28 Dutch planning is widely known and admired for its ambitions and its achievements This book provides for the first time a comprehensive description and analysis in English of its full range of policies and practices It gives an up to date account of the principles written and unwritten behind the planning and in addition shows how the practice sometimes ignores those principles in order to achieve better results It describes the content of the policies the measures taken to realise them and the successes and failures The book is not uncritical of Dutch land use planning but the author values its strengths and believes that planning in other countries could learn from them These strengths arise in the continuing tension between the high ambitions of the Dutch planning and the ingenuity and pragmatism exercised in order to realise those ambitions Sustainable Land Use Planning H. N. van

Lier, 1994 Hardbound This book deals entirely with the new challenge of sustainable land use Focusing primarily on rural land uses it answers many questions e g what is sustainability how can it be achieved what role can land use planning play and how can it be incorporated into existing land use planning methods by demonstrating new policies new methods and examples of projects that include sustainability in land use planning This book will be of great value to landscape and urban planners environmental scientists conservationists and all those responsible for creating policies and making projects regarding future land uses and rural reconstructions in the countryside **Strategic Land Use Planning Source Book**

Corkindale, 1998 The conventional wisdom in land use planning circles is that the 1947 Town and Country Planning Acts represent the most important step forward in the history of British land use planning This is not a view that is based on systematic evaluation and as this paper argues there are good reasons for believing it to be misplaced The problems with the land use planning system are analogous to those previously experienced with a number of the nationalised industries Just as many of those industries failed to deliver economic efficiency or often even a service to customers so nationalised land development rights and the large element of administrative discretion in land use planning do not seem to be delivering results in a way that is either cost effective or in line with what people

actually want      **Guidelines for Land-use Planning** Food and Agriculture Organization of the United Nations.
