exploring the theoretical and practical aspects of storage systems and computing methods for large forms of data Featuring coverage on a broad range of topics such as binary image fuzzy logic and metaheuristic algorithms this book is ideally designed for computer engineers IT professionals technology developers academicians and researchers seeking current research on advancing strategies and computing techniques for various types of data *Lloyd's Register of British and Foreign Shipping* ,1964 **Computer Vision Technology for Food Quality Evaluation** Da-Wen Sun,2011-04-28 The first book in this rapidly expanding area Computer Vision Technology for Food Quality Evaluation thoroughly discusses the latest advances in image processing and analysis Computer vision has attracted much research and development attention in recent years and as a result significant scientific and technological advances have been made in quality inspection classification and evaluation of a wide range of food and agricultural products This unique work provides engineers and technologists working in research development and operations in the food industry with critical comprehensive and readily accessible information on the art and science of computer vision technology Undergraduate and postgraduate students and researchers in universities and research institutions will also find this an essential reference source Discusses novel technology for recognizing objects and extracting quantitative information from digital images in order to provide objective rapid non contact and non destructive quality evaluation International authors with both academic and professional credentials address in detail one aspect of the relevant technology per chapter making this ideal for textbook use Divided into three parts it begins with an outline of the fundamentals of the technology followed by full coverage of the application in the most researched areas of meats and other foods fruits vegetables and grains **Computational Intelligence, Communications, and Business Analytics** Jyotsna Kumar Mandal,Somnath Mukhopadhyay,Paramartha Dutta,Kousik Dasgupta,2019-06-24 The two volume set CCIS 1030 and 1031 constitutes the refereed proceedings of the Second International Conference on Computational Intelligence Communications and Business Analytics CICBA 2018 held in Kalyani India in July 2018 The 76 revised full papers presented in the two volumes were carefully reviewed and selected from 240 submissions The papers are organized in topical sections on computational intelligence signal processing and communications microelectronics sensors and intelligent networks data science intelligent data mining and computational forensics privacy and security *Enchiridion siue Manuale confessoriorum et pœnitentium, complectens resolutionem pœnè omnium dubiorum quæ in sacris confessionibus occurrere solent, circa peccata, absolutiones, restitutiones, censuras&irregularitates: iampridem sermone Hispano compositum ...&postea Romæ latinitate donatum ... nunc autem denuo recognitum,&multis locis emêdatum, etc* Martín de AZPILCUETA,1581 **Advances in Data Clustering** Fadi Dornaika,Denis Hamad,Joseph Constantin,Vinh Truong Hoang,2024-12-29 Clustering a foundational technique in data analytics finds diverse applications across scientific technical and business domains Within the theme of Data Clustering this book assumes substantial importance due to its indispensable clustering role in various contexts As the era of online media

facilitates the rapid generation of large datasets clustering emerges as a pivotal player in data mining and machine learning At its core clustering seeks to unveil heterogeneous groups within unlabeled data representing a crucial unsupervised task in machine learning The objective is to automatically assign labels to each unlabeled datum with minimal human intervention Analyzing this data allows for categorization and drawing conclusions applicable across diverse application domains The challenge with unlabeled data lies in defining a quantifiable goal to guide the model building process constituting the central theme of clustering This book presents concepts and different methodologies of data clustering For example deep clustering of images semi supervised deep clustering deep multi view clustering etc This book can be used as a reference for researchers and postgraduate students in related research background

Diagnostic Imaging in Medicine Richard C. Reba, David J. Goodenough, H.F. Davidson, 2012-12-06 An Advanced Study Institute on Ultrasonics in Medical Diagnosis was held in Milan Italy from 10 to 15 June 1974 This ASI was of a short five day duration and limited to cardiac diagnosis by ultrasound only Since that time the field of diagnostic imaging in medicine has literally exploded with new and improved means of medical diagnosis such as computed tomography microwaves nuclear magnetic resonance and other sophisticated techniques These developments have enabled medical practitioners to make diagnoses with a minimum of danger to the patient and a maximum of accuracy never before possible and represent a multi quantum advance over the early state of the art presented at the 1974 ASI Since then several meetings have taken place on these individual topics to bring together experts who presented their latest research results but none have discussed the entire field of diagnostic imaging in medicine in one meeting nor have they had the teaching character of an Advanced Study Institute The art and science of medicine have been altered repeatedly during the eight year interval since the last ASI Today s clinician must be part technologist and must be enough of an investigator to understand and appreciate the scientific method The current complex advances in instrumentation and pharmacology have had a marked effect on how medicine is practiced There was therefore an urgent need to bring the entire field of imaging in medicine to one teaching podium where the many advances of the last six or seven years could be reviewed
