## **Crct 8th Answer Sheet 2014:**

**Where the Hell is Middle America?** Terrence Stone, 2024-08-31 Are you tired of the political discord between the two major political parties and feel a deep rift among the electorate Well the author does and dives into our current divisive political climate and its impact on our social climate And he places much of the blame on our politicians for this disharmony While self identifying as fiscally conservative but more socially liberal the author previously felt he was a lifelong moderate Republican However he has become disenchanted with the GOP of late He examines many of the typically divisive topics that often distinguish Republicans and Democrats Exploring other political parties was also enlightening and now realizes he is more moderate centrist than previously thought Today s politicians often pander to their extremist ends rarely considering the middle third of the electorate that identify as moderate If a formidable moderate centrist candidate could wrest away the dominance of the two major parties by providing some competition it could force the Republican and Democratic politicians to act better After all competition in the marketplace can help bring down prices for our betterment wouldn t more competition in the political arena also be for our betterment The author shows that some middle ground may be met by offering some simple solutions to often complex political topics If more of the electorate could lean towards the middle further away from the far right and left extremist ends then we could gain additional support for more moderate major party candidates or even prevalent third party candidates

*Rethinking Value-Added Models in Education* Audrey Amrein-Beardsley, 2014-04-24 Since passage of the No Child Left Behind Act in 2001 academic researchers econometricians and statisticians have been exploring various analytical methods of documenting students academic progress over time Known as value added models VAMs these methods are meant to measure the value a teacher or school adds to student learning from one year to the next To date however there is very little evidence to support the

trustworthiness of these models What is becoming increasingly evident yet often ignored mainly by policymakers is that VAMs are 1 unreliable 2 invalid 3 nontransparent 4 unfair 5 fraught with measurement errors and 6 being inappropriately used to make consequential decisions regarding such things as teacher pay retention and termination Unfortunately their unintended consequences are not fully recognized at this point either Given such the timeliness of this well researched and thoughtful book cannot be overstated This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research based ways
