The Runaway Species David Eagleman, Anthony Brandt, 2018-06-19 This enlightening examination of creativity looks at art and science together to examine how innovations build on what already exists and rely on three brain operations bending breaking and blending The Wall Street Journal The Runaway Species is a deep dive into the creative mind a celebration of the human spirit and a vision of how we can improve our future by understanding and embracing our ability to innovate David Eagleman and Anthony Brandt seek to answer the question what lies at the heart of humanity's ability and drive to create Our ability to remake our world is unique among all living things But where does our creativity come from how does it work and how can we harness it to improve our lives schools businesses and institutions Eagleman and Brandt examine hundreds of examples of human creativity through dramatic storytelling and stunning images in this beautiful full color volume By drawing out what creative acts have in common and viewing them through the lens of cutting edge neuroscience they uncover the essential elements of this critical human ability and encourage a more creative future for all of us The Runaway Species approaches creativity scientifically but sensitively feeling its roots without pulling

them out The Economist **Middle Grades Research Journal** Frances R. Spielhagen,2014-10-01 Middle Grades Research Journal MGRJ is a refereed peer reviewed journal that publishes original studies providing both empirical and theoretical frameworks that focus on middle grades education A variety of articles are published quarterly in March June September and December of each volume year Madness and Creativity: Yes, No or Maybe? Anna Abraham,2015-11-23 The pervasive idea that madness and creativity are intricately linked is one that holds tremendous fascination for both scientists and the general public alike Although this view was at first largely driven by anecdotal evidence showcasing the manifestation of mental illness in individuals who exhibited extraordinary levels of creativity in various spheres of life it initiated a strong impetus to empirically investigate the association between mental health and creativity A variety of approaches and combinations of approaches have been adopted to address this association including clinical personality psychometric behavioral cognitive historiometric and neuroscientific Despite the ever accumulating body of evidence over the past six decades investigating this link what is lacking is a comprehensive overview of the disparate findings from these different approaches that will enable us to address the question of whether there is an empirically founded relationship between creativity and mental illness And if such a link does exist what is the nature of this association The purpose of this Research Topic was to motivate theorists and researchers to answer this question or at least attempt to do so given the available evidence thus far The themes of interest that were open to exploration in view of this topic included a Which mental disorders are positively associated with creativity b Which mental disorders are negatively associated with creativity c The dynamics of information processing biases positive versus negative associated with psychiatric and high risk populations d Theories regarding the madness creativity link e Personality based studies on creativity f Creativity mental illness and the brain g Genes and creativity h How can studies on neurological populations inform this debate i What are the areas of impact with regard to real world applications and practice j Historical timeline of this question k Evolutionary perspectives on the madness creativity link l Methodological problems associated with this field m Philosophical issues to bear in mind when investigating this domain n The usefulness of the troubled genius concept The invitation to contribute was open to all interested academics regardless of whether they were seasoned explorers within this field of study or just beginning to get their feet wet in its murky waters As a result of adopting this inclusive approach the contributions showcase a wide variety of perspectives from academic departments and institutions the world over What is most encouraging is that so many were willing to openly take on the challenge of tackling this difficult question head on We hope future discussions that follow through as a result of this collective effort will prove to be just as fruitful **Handbook of Special Education** James M. Kauffman,Daniel P. Hallahan,Paige Cullen Pullen,2017-05-25 The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education To ensure consistency across the volume chapter authors review and integrate existing research identify strengths and weaknesses note gaps in the

literature and discuss implications for practice and future research The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research and an entirely new section has been added on research methods in special education

What Can Neuroscience Learn from Contemplative Practices? Zoran Josipovic, Bernard J. Baars, 2016-09-22 A recent wave of brain research has advanced our understanding of the neural mechanisms of conscious states contents and functions A host of questions remain to be explored as shown by lively debates between models of higher vs lower order aspects of consciousness as well as global vs local models Baars 2007 Block 2009 Dennett and Cohen 2011 Lau and Rosenthal 2011 Over some twenty five centuries the contemplative traditions have also developed explicit descriptions and taxonomies of the mind to interpret experiences that are often reported in contemplative practices Radhakrishnan Rinbochay reflexivity or self knowing associated with consciousness the sense of self and consciousness and aspects of consciousness that are said to continue during sleep These real or claimed aspects of consciousness have not been fully integrated into scientific models so far This Research Topic in Consciousness Research aims to provide a forum for theoretical proposals new empirical findings integrative literature reviews and methodological improvements inspired by meditation based models We include a broad array of topics including but not limited to replicable findings from a variety of systematic mental practices changes in brain functioning and organization that can be attributed to such practices their effects on adaptation and neural

plasticity measurable effects on perception cognition affect and self referential processes We include contributions that address the question of causal attribution Many published studies are correlational in nature because of the inherent difficulty of conducting longitudinal experiments based on a major lifestyle decision such as the decision to commit to a mental practice over a period of years We also feature clinical and case studies integrative syntheses and significant opinion articles Resources in Education ,1986 **Notelets of Filth** Laura Kressly,Aida Patient,Kimberly A. Williams,2022-12-30 This collection of short accessible essays serves as a supplementary text to Morgan Lloyd Malcolm s play Emilia Critically acclaimed and beloved by audiences this innovative and ground breaking show is a speculative history an imaginative re telling of the life of English Renaissance poet Aemilia Bassano Lanyer This book features essays by theatre practitioners activists and scholars and informed by intersectional feminist critical race queer and postcolonial analyses will enable students and their teachers across secondary school and higher education to consider the play s major themes from a wide variety of theoretical and interdisciplinary perspectives This volume explores the current events and cultural contexts that informed the writing and performing of Emilia between 2017 and 2019 various aspects of the professional London productions critical and audience responses and best practices for teaching the play to university and secondary school students It includes a foreword by Emilia playwright Morgan Lloyd Malcolm This book will be of great interest to students and scholars of theatre arts activism feminist literature and theory The New Breed Kate Darling,2021-04-20 A must read for anyone interested in the emerging ethics of robotics Irene M Pepperberg A bold optimistic exploration of the relationship between robots and humans based on our history with animals from a renowned MIT researcher The robots are here They make our cars they deliver fast food they mine the sea floor And in the near future their presence will increasingly enter our homes and workplaces making human robot interaction a frequent everyday occurrence What will this future look like What will define the relationship between humans and robots Here Kate Darling a world renowned expert in robot ethics shows that in order to understand the new robot world we must first move beyond the idea that this technology will be something like us Instead she argues we should look to our relationship with animals Just as we have harnessed the power of animals to aid us in war and work so too will robots supplement rather than replace our own skills and abilities A deeply original analysis of our technological future and the ethical dilemmas that await us The New Breed explains how the treatment of machines can reveal a new understanding of our own history our own systems and how we relate not just to non humans but also to each other
