Rhetorical Delivery and Digital Technologies Sean Morey, 2015-11-19 This book theorizes digital logics and applications for the rhetorical canon of delivery Digital writing technologies invite a re evaluation about what delivery can offer to rhetorical studies and writing practices Sean Morey argues that what delivery provides is access to the unspeakable unconscious elements of rhetoric not primarily through emotion or feeling as is usually offered by previous studies but affect a domain of sensation implicit in the overlooked original Greek term for delivery hypokrisis Moreover the primary means for delivering affect is both the logic and technology of a network construed as modern digital networks but also networks of associations between humans and nonhuman objects Casting delivery in this light offers new rhetorical trajectories that promote its incorporation into digital networked bodies Given its provocative and broad reframing of delivery this book provides original robust ways to understand rhetorical delivery not only through a lens of digital writing technologies but all historical means of enacting delivery offering implications that will ultimately affect how scholars of rhetoric will come to view not only the other canons of rhetoric but rhetoric as a whole *The Makeup Artist Handbook* , *The Brain-Dead Organ Donor* Dimitri Novitzky, David K. C. Cooper, 2012-10-28 Addressing all aspects of brain death and thoroughly detailing how a potential organ donor should be maintained to ensure maximum use of the organs and cells *The Brain Dead Organ Donor Pathophysiology and Management* is a landmark addition to the literature This first of its kind multidisciplinary volume will be of interest to a large section of the medical community The first section of the book reviews the historical medical legal and ethical aspects of brain death That is followed by two chapters on the pathophysiology of brain death as investigated in small and large animal models This includes a review of the many hormonal changes including the neuroendocrine adrenergic storm that takes place during and following the induction of brain death and how they impact metabolism The next section of the book reviews various effects of brain death namely its impact on thyroid function the inflammatory response that develops and those relating to innate immunity The chapters relating to assessment and management of potential organ donors will be of interest to a very large group of transplant surgeons and physicians as well as critical care and neurocritical care physicians and nurses Neurologists endocrinologists neurosurgeons and pathologists will also be interested especially in the more basic science sections on various aspects of brain death and hormonal therapy Organ procurement organizations and transplant coordinators worldwide will also be interested in this title Other chapters will be of interest to medical historians medico legal experts and ethicists **The Giant Encyclopedia of Theme Activities for Children 2 to 5** Kathy Charner, 1993 This popular potpourri of over 600 classroom tested activities actively engages children s imaginations and provides many months of learning fun Organized into 48 popular themes from Dinosaurs to Circus to Outer Space these favorite activities are the result of a nationwide competition Join the ranks of teachers who are already using and loving this valuable resource **Arctic Bibliography** Arctic Institute of North America, 1960 *Interactions* Bicky A. Marquez, 2024-12-02 This book examines how predicting the future based on analytical and

empirical models is essential for our species survival stable organization and well being At a high level information exchange mainly through communication between people fosters a deeper understanding of reality and strengthens human bonds ultimately contributing to the emergence of societies as new creatures or superorganisms with significantly more data to feed those models Communication is fundamental to the development of complex organisms the maintenance of internal order and the propagation of knowledge via cultural packets The human brain s plasticity memory and learning capabilities enable storage and rapid responses to new information enhancing our decision making and forecasting abilities The book discusses the complexity of multicellular organisms and the mechanisms that coordinate their internal subsystems highlighting the emergence of hierarchies from fundamental particles to networks of superorganisms The interconnectedness of biological oscillators with prominent similarities enables synchronization as a foundation for their superior organization and collective agreements Finally this book explores the human quest to enhance survival through accumulating knowledge and developing tools and technologies It underscores the significance of artificial intelligence as a tool to support cognitive abilities and address global challenges while acknowledging our limited control over reality within an independently operating universe
