Week 29

Day 5

- You know that islands may be volcanic or built-up coral. What is another way islands are formed?
- Islands may be the peaks or coastal mountains that were cut off after sea levels rose at the end of an ice age. Islands off the coast of Maine are of this type. Islands may be formed when some of the land on a continent sinks and fills with sea water, cutting off another part of the continent. Japan and the British Isles were formed in this way.
