Junior Graphic Mavis Kitcher (Mrs),2014-06-18 **Modern Mathematics** Dirk De Bock,2023-03-08

The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends

Community Participation with Schools in Developing Countries Mikiko Nishimura,2020-08-04

The Sustainable Development Goals SDGs 2016 2030 set by the United Nations in 2015 restated the importance of universal primary education for all and specifically discuss quality equity and inclusion in basic education To

achieve this the role of community has been emphasized and participation has become a buzzword in international development over the past several decades Despite the growing attention to community participation in school management previous literature has shown mixed results in terms of its actual practice and its impacts on quality equity and inclusion in education This book deepens the contextual understanding of community in developing countries and its involvement in schools in general and its impact on quality equity and inclusion of school education in particular By presenting various case studies in Asia Africa Latin America and a post conflict state in Europe the book analyses commonalities and differences in the ways communities are involved and cast their impacts and challenges The book contributes knowledge on the ways in which community involvement could work in developing countries the detailed processes and factors that make community participation work in different dimensions and remaining challenges that scholars and practitioners still need to be concerned and mindful in the field This book will appeal to both researchers and practitioners who are concerned about the community participation approach for the SDGs

The Circular Economy Pablo del Río, Christoph P. Kiefer, Javier Carrillo-Hermosilla, Totti Könnölä, 2021-07-02 This book provides an in depth analysis of the concept of the Circular Economy CE as well as an assessment of the drivers and barriers for circular practices by firms and its implications for managers in firms and public policy makers It includes proposals for policy frameworks and instruments that will encourage the uptake of CE practices The book is presented in three linked parts The first part of the book provides a broad view of the topic put into the wider context of sustainability In the second part the drivers of and barriers to the uptake of the CE are analysed with a special focus on the micro level not seen often in the previous studies on the CE This book is of interest to researchers policy makers and post graduate students in areas such as environmental management and economics
