McEneaney, 2009-04-30 While The Right Stuff and The Bonfire of the Vanities remain perhaps his best known works Tom Wolfe's journalism and fiction continues to enjoy a large audience perhaps chiefly because of the variety of his subjects and his controversial approach to them Here McEneaney offers an account of the man and his works explaining along the way

Wolfe's use of irony, his obsessive themes and even his use of pranks. More comprehensive in scope than any preceding book on Wolfe, it offers accurate and accessible commentary based upon what Wolfe admits about his own work. In this new book, Wolfe's work is put in journalistic and literary context. The reliability of Wolfe's journalism is discussed especially when there are alternative narrations to events he has depicted. McEneaney also examines the Wolfe's use of pranks that he plays on readers at times and uncovers the influences on Wolfe that have contributed to his unique style. Finally, the author discusses Wolfe's impact on other writers. Readers will gain access into Wolfe's world through this detailed and colorful work.

In *The Second Self*, Sherry Turkle looks at the computer not as a tool but as part of our social and psychological lives; she looks beyond how we use computer games and spreadsheets to explore how the computer affects our awareness of ourselves, of one another and of our relationship with the world. Technology, she writes, catalyzes changes not only in what we do but in how we think. First published in 1984, *The Second Self* is still essential reading as a primer in the psychology of computation. This twentieth anniversary edition allows us to reconsider two decades of computer culture, to re-experience what was and is most novel in our new media culture and to view our own contemporary relationship with technology with fresh eyes. Turkle frames this classic work with a new introduction, a new epilogue and extensive notes added to the original text. Turkle talks to children, college students, engineers, AI scientists, hackers and personal computer owners, people confronting machines that seem to think and at the same time suggest a new way for us to think about human thought, emotion, memory and understanding. Her interviews reveal that we experience computers as being on the border between inanimate and animate.

as both an extension of the self and part of the external world Their special place betwixt and between traditional categories is part of what makes them compelling and evocative In the introduction to this edition Turkle quotes a PDA user as saying When my Palm crashed it was like a death I thought I had lost my mind Why we think of the workings of a machine in psychological terms how this happens and what it means for all of us is the ever more timely subject of *The Second Self*
