Curriculum Handbook with General Information Concerning ... for the United States Air Force Academy

United States Air Force Academy,1995 *Course-Based Undergraduate Research* Nancy H. Hensel,2023-07-03 Co published with the Council on Undergraduate Research Undergraduate research has long been recognized as a high impact practice HIP but has unfortunately been offered only to juniors and seniors and to very few of them often in summer programs This book shows how to engage students in authentic research experiences built into the design of courses in the first two years thus making the experience available to a much greater number of students Research that is embedded in a course especially general education courses addresses the issue of how to expand undergraduate research to all students Research has shown that students who have early experiences in undergraduate research are more likely to pursue further research prior to and after graduation This is also an issue of social justice because it makes the benefits of undergraduate research available to students who must work during the academic year and in the summer It is widely accepted that the skills developed through undergraduate research help prepare students for their future careers The book addresses all aspects of the topic including What are appropriate expectations for research in the first two years How to design appropriate course based research for first and second year students How to mentor a class rather than individual students How students can disseminate the results of their research Possible citizen science projects appropriate for the first and second years Providing additional resources available to support course based research in the first two years Designed for faculty at four year and two year colleges and including examples from the sciences the social sciences and the humanities the strategies and methods described can be adapted to disciplines not specifically mentioned in the book Many faculty are hesitant to engage first and second year students in undergraduate research because they worry students don't know enough to conduct authentic research in their discipline because they worry about the time it will take to develop activities for these students and because they wonder how they can mentor a whole class of students doing research The authors have successfully dealt with these issues and provide examples of how it's done **Powerful Teaching** Pooja K. Agarwal,Patrice M. Bain,2019-05-13 Unleash powerful teaching and the science of learning in your classroom Powerful Teaching Unleash the Science of Learning empowers educators to harness rigorous research on how students learn and unleash it in their classrooms In this book cognitive scientist Pooja K Agarwal Ph D and veteran K 12 teacher Patrice M Bain Ed S decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings This practical resource is filled with evidence based strategies that are easily implemented in less than a minute without additional prepping grading or funding Research demonstrates that these powerful strategies raise student achievement by a letter grade or more boost learning for diverse students grade levels and subject areas and enhance students higher order learning and transfer of knowledge beyond the classroom Drawing on a fifteen year scientist teacher collaboration more than

100 years of research on learning and rich experiences from educators in K 12 and higher education the authors present highly accessible step by step guidance on how to transform teaching with four essential strategies Retrieval practice spacing interleaving and feedback driven metacognition With Powerful Teaching you will Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real world examples of how evidence based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research based perspective Develop tools to share the science of learning with students and parents ensuring success inside and outside the classroom Powerful Teaching Unleash the Science of Learning is an indispensable resource for educators who want to take their instruction to the next level Equipped with scientific knowledge and evidence based tools turn your teaching into powerful teaching and unleash student learning in your classroom International Conference of the Learning Sciences Barry J.
