Africa 2015-2016 Francis Wiafe-Amoako, 2015-08-20 The World Today Series Africa provides students with vital information on all countries on the African continent through a thorough and expert overview of political and economic histories current events and emerging trends Each country is examined through the following sections Basic Facts Land and People The Past Political and Economic History The Present Contemporary Issues and The Future In addition to country chapters the book features extended essays on Africa s Historical Background and the Colonial Period The combination of factual accuracy and up to date detail along with its informed projections make this an outstanding resource for researchers practitioners in international development media professionals government officials potential investors and students The content is thorough yet perfect for a one semester introductory course or general library reference Available in both print and e book formats and priced low to fit student and library budgets Public expenditure on food and agriculture in sub-Saharan Africa Pernechele, V., Fontes, F., Baborska, R., Nkuingoua, J., Pan, X., Tuyishime, C., 2021-05-07 Monitoring and analysing food and agriculture policies and their effects is crucial to support decision makers in developing countries to shape better policies that drive agricultural and food systems transformation This report is a technical analysis of government spending data on food and agriculture during 2004 2018 in 13 sub Saharan African countries Benin Burkina Faso Burundi Ethiopia Ghana Kenya Malawi Mali Mozambique Rwanda Senegal Uganda and the United Republic of Tanzania It analyses the level of public expenditure including budget execution source of funding and decentralized spending as well as the composition of expenditure including on producer or consumer support research and development infrastructure and more to reveal the trends and challenges that countries are facing It also delves into the relationship between the composition of public expenditure and agricultural performance As a way forward for future policymaking the report offers a set of recommendations to strengthen policy monitoring systems and data generation for effective public investments in food and agriculture The report is produced by the Monitoring and Analysing Food and Agricultural Policies MAFAP programme at FAO in collaboration with MAFAP country partners Wealth, Power, and Authoritarian Institutions Michaela Collord, 2024-07-12 Through an analysis of the recent political history of Tanzania and Uganda Wealth Power and Authoritarian Institutions offers a novel explanation of why authoritarian parties and legislatures vary in strength and why this variation matters Michaela Collord elaborates a view of authoritarian political institutions as both reflecting and magnifying elite power dynamics While there are many sources of elite power the book centres on material power It outlines how diverse trajectories of state led capitalist development engender differing patterns of wealth accumulation and elite contestation across regimes These differences in turn influence institutional landscapes Where accumulation is more closely controlled by state and party leaders as was true in Tanzania until economic liberalization in the 1980s rival factions remain subdued Ruling parties can then consolidate relatively strong institutional structures and parliament remains marginal

Conversely where a class of private wealth accumulators expands as occurred in Tanzania after the 1980s and in Uganda after the National Resistance Movement took power in 1986 rival factions can more easily form simultaneously eroding party institutions and encouraging greater legislative strength Collord uses this analysis to reassess the significance of a stronger legislature She considers its influence on distributive politics both regressive and progressive She also considers its relation to democratization particularly in a context of broader liberalizing reforms The book ultimately encourages a closer examination of how would be democratic institutions interact with an underlying power distribution shaping in whose interests they operate Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines Volumes concentrate on contemporary developments in African political science political economy and International Relations such as electoral politics democratization decentralization gender and political representation the political impact of natural resources the dynamics and consequences of conflict comparative political thought and the nature of the continent s engagement with the East and West Comparative and mixed methods work is particularly encouraged Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates The focus of the series is on sub Saharan Africa although proposals that explain how the region engages with North Africa and other parts of the world are of interest General Editors Nic Cheeseman Peace Medie and Ricardo Soares de Oliveira

Narratives of Mass Atrocity Sarah Federman, Ronald Niezen, 2022-09-08 Individuals can assume and be assigned multiple roles throughout a conflict perpetrators can be victims and vice versa heroes can be reassessed as complicit and compromised However accepting this more accurate representation of the narrativized identities of violence presents a conundrum for accountability and justice mechanisms premised on clear roles This book considers these complex sometimes overlapping roles as people respond to mass violence in various contexts from international tribunals to NGO based social movements Bringing the literature on perpetration in conversation with the more recent field of victim studies it suggests a new more effective and reflexive approach to engagement in post conflict contexts Long term positive peace requires understanding the narrative dynamics within and between groups demonstrating that the blurring of victim perpetrator boundaries and acknowledging their overlapping roles is a crucial part of peacebuilding processes This title is also available as Open Access on Cambridge Core

The Wisdom of Plagues Donald G. McNeil, 2024-01-09 Award winning New York Times reporter Donald G McNeil Jr reflects on twenty five years of covering pandemics how governments react to them how the media covers them how they are exploited and what we can do to prepare for the next one in this fascinating ferocious fusillade against humanity s two deadliest enemies disease and itself The Economist For millions of Americans Donald G McNeil Jr was a comforting voice when the COVID 19 pandemic broke out He was a regular

reporter on The New York Times's popular podcast The Daily and told listeners early on to prepare for the worst. He'd covered public health for twenty-five years and quickly realized that an obscure virus in Wuhan, China, was destined to grow into a global pandemic rivaling the 1918 Spanish flu. Because of his clear advice, a generation of Times readers knew the risk was real but that they might be spared by taking the right precautions. Because of his prescient work, The New York Times won the 2021 Pulitzer Gold Medal for Public Service. *The Wisdom of Plagues* is must reading for preparing us better for the next unavoidable epidemic.

Peter Piot, MD, co-discoverer of Ebola, as McNeil shares his account of what he learned over a quarter century of reporting in over sixty countries. Many science reporters understand the basics of diseases from how a virus works to what goes into making a vaccine. But very few understand the psychology of how small outbreaks turn into pandemics, why people refuse to believe they're at risk, or why they reject protective measures like quarantine or vaccines. The COVID-19 pandemic was the story McNeil had trained his whole life to cover. His expertise and breadth of sources let him make many accurate predictions in 2020 about the course that a deadly new virus would take and how different countries would respond. By the time McNeil wrote his last New York Times stories, he had not lost his compassion, but he had grown far more stone-hearted about how governments should react. He had witnessed enough disasters and read enough history to realize that while every epidemic is different, failure was the one constant. Small case clusters ballooned into catastrophe because weak leaders became mired in denial. Citizens refused to make even minor sacrifices for the common good. They were encouraged in that by money-hungry entrepreneurs and power-hungry populists. Science was ignored, obvious truths were denied, and the innocent too often died.

In *The Wisdom of Plagues*, one of the most enlightening books on public health, Lena Wen, MD, McNeil offers tough prescriptive advice on what we can do to improve global health and be better prepared for the inevitable next pandemic.

Fifteenth General Review of Quotas—Further Considerations International Monetary Fund. Finance Dept., International Monetary Fund. Strategy, Policy, & Review Department, 2021-03-05

The paper revisits the two-pillar framework for assessing the adequacy of Fund resources. Responding to Directors' suggestions, the quantitative pillar is updated to include alternative assumptions and to provide a longer-term perspective on likely resource needs. While quantitative estimates are generally somewhat lower after factoring in the alternative assumptions, these reductions are more than outweighed when the analysis is extended through the middle of the next decade, recognizing that the outcome of the 15th Review will likely determine permanent Fund resources through at least the middle of the next decade. The updated qualitative pillar analysis highlights reforms since the global financial crisis and discusses uncertainties in the global environment. It also provides an assessment of the general impact of the various qualitative considerations. Taken together, the two pillars continue to make a case for at least maintaining existing

Fund resources Against this background the simulations in the paper cover three illustrative sizes for quota increases 50 75 and 100 percent centered on broadly maintaining Fund resources assuming the New Arrangements to Borrow NAB is maintained at its current level and Bilateral Borrowing Agreements BBAs expire

Survey of access and benefit-sharing country measures accommodating the distinctive features of genetic resources for food and agriculture and associated traditional knowledge Food and Agriculture Organization of the United Nations,2021-09-01 The Commission on Genetic Resources for Food and Agriculture at its Seventeenth Regular Session requested its Secretary to prepare for review by the intergovernmental technical working groups on animal aquatic forest and plant genetic resources to produce an up to date survey of existing legislative administrative and policy approaches including best practices for ABS for the different subsectors of GRFA and traditional knowledge associated with GRFA held by indigenous peoples and local communities with the aim of identifying typical approaches and lessons learned from their implementation as well as challenges and possible solutions The current survey comprises a baseline desktop review of legislation policy and literature It provides a review of how countries address the distinctive features of GRFA and TKGRFA based on the letter of their ABS legislative administrative and policy measures rather than on how these measures have been implemented in practice It therefore does not provide an analysis of the state of implementation the challenges involved and possible solutions to these challenges As such it aims to provide a basis for future empirical research on how ABS measures work in practice for GRFA subsectors A specific objective is to provide a typology of legislative administrative and policy measures applying to ABS for GRFA and TKGRFA

[The Report: Kenya 2017](#) , As the largest economy in the EAC and COMESA in terms of GDP Kenya has positioned itself as a major economic power in sub Saharan Africa Traditionally a largely agrarian economy Kenya has quickly entrenched its position as a manufacturing logistics and technology hub in the region and this diversification forms a solid platform from which the government can generate economic growth over the coming years The resolution of the electoral process improving business confidence and strong private consumption are likely to support GDP expansion over 2018 and into 2019 In April 2018 the IMF estimated the economy would expand by 5 5% in 2018 and 6% in 2019 compared to 4 8% in 2017
