Committee on Education and Labor, 2008      *Whither Opportunity?* Greg J. Duncan, Richard J. Murnane, 2011-09-01 As the incomes of affluent and poor families have diverged over the past three

decades so too has the educational performance of their children But how exactly do the forces of rising inequality affect the educational attainment and life chances of low income children In *Whither Opportunity* a distinguished team of economists sociologists and experts in social and education policy examines the corrosive effects of unequal family resources disadvantaged neighborhoods insecure labor markets and worsening school conditions on K 12 education This groundbreaking book illuminates the ways rising inequality is undermining one of the most important goals of public education the ability of schools to provide children with an equal chance at academic and economic success The most ambitious study of educational inequality to date *Whither Opportunity* analyzes how social and economic conditions surrounding schools affect school performance and children s educational achievement The book shows that from earliest childhood parental investments in children s learning affect reading math and other attainments later in life Contributor Meredith Phillip finds that between birth and age six wealthier children will have spent as many as 1 300 more hours than poor children on child enrichment activities such as music lessons travel and summer camp Greg Duncan George Farkas and Katherine Magnuson demonstrate that a child from a poor family is two to four times as likely as a child from an affluent family to have classmates with low skills and behavior problems attributes which have a negative effect on the learning of their fellow students As a result of such disparities contributor Sean Reardon finds that the gap between rich and poor children s math and reading achievement scores is now much larger than it was fifty years ago And such income based gaps persist across the school years as Martha Bailey and Sue Dynarski document in their chapter on the growing income based gap in college completion *Whither Opportunity* also reveals the profound impact of environmental factors on children s educational progress and schools functioning Elizabeth Ananat Anna Gassman Pines and Christina Gibson Davis show that local job losses such as those caused by plant closings can lower the test scores of students with low socioeconomic status even students whose parents have not lost their jobs They find that community wide stress is most likely the culprit Analyzing the math achievement of elementary school children Stephen Raudenbush Marshall Jean and Emily Art find that students learn less if they attend schools with high student turnover during the school year a common occurrence in poor schools And David Kirk and Robert Sampson show that teacher commitment parental involvement and student achievement in schools in high crime neighborhoods all tend to be low For generations of Americans public education provided the springboard to upward mobility This pioneering volume casts a stark light on the ways rising inequality may now be compromising schools functioning and with it the promise of equal opportunity in America

**The Charter School Experiment** Christopher A. Lubienski, Peter C. Weitzel, 2010-09-01 When charter schools first arrived on the American educational scene few observers suspected that within two decades thousands of these schools would be established serving almost a million and a half children across forty states The widespread popularity of these schools and of the charter movement itself speaks to the unique and chronic desire for substantive change in American education As an innovation in governance the ultimate goal of

the charter movement is to improve learning opportunities for all students not only those who attend charter schools but also students in public schools that are affected by competition from charters In The Charter School Experiment a select group of leading scholars traces the development of one of the most dynamic and powerful areas of education reform Contributors with varying perspectives on the charter movement carefully evaluate how well charter schools are fulfilling the goals originally set out for them introducing competition to the school sector promoting more equitable access to quality schools and encouraging innovation to improve educational outcomes They explore the unintended effects of the charter school experiment over the past two decades and conclude that charter schools are entering a new phase of their development beginning to serve purposes significantly different from those originally set out for them

**Essential Readings in Problem-Based Learning** Andrew Walker, Heather Leary, Cindy Hmelo-Silver, 2015-01-15 Like most good educational interventions problem based learning PBL did not grow out of theory but out of a practical problem Medical students were bored dropping out and unable to apply what they had learned in lectures to their practical experiences a couple of years later Neurologist Howard S Barrows reversed the sequence presenting students with patient problems to solve in small groups and requiring them to seek relevant knowledge in an effort to solve those problems Out of his work PBL was born The application of PBL approaches has now spread far beyond medical education Today PBL is used at levels from elementary school to adult education in disciplines ranging across the humanities and sciences and in both academic and corporate settings This book aims to take stock of developments in the field and to bridge the gap between practice and the theoretical tradition originated by Barrows that underlies PBL techniques

The Integration Debate Chester Hartman, Gregory Squires, 2009-09-11 Racial integration and policies intended to achieve greater integration continue to generate controversy in the United States with some of the most heated debates taking place among long standing advocates of racial equality Today many nonwhites express what has been referred to as integration exhaustion as they question the value of integration in today's world And many whites exhibit what has been labeled race fatigue arguing that we have done enough to reconcile

the races Many policies have been implemented in efforts to open up traditionally restricted neighborhoods while others have been designed to diversify traditionally poor often nonwhite neighborhoods Still racial segregation persists along with the many social costs of such patterns of uneven development This book explores both long standing and emerging controversies over the nation s ongoing struggles with discrimination and segregation More urgently it offers guidance on how these barriers can be overcome to achieve truly balanced and integrated living patterns      **Deep Change** Gerald Ponder,David Strahan,2005-11-01 This book presents cases of schools Part One and programs at the district level and beyond Part Two in which reform while driven by high stakes accountability became larger and deeper through data driven dialogue culture change organizational learning and other elements of high performing cultures Commentaries on cross case patterns by Ann Lieberman and Michael Fullan and a chapter on now what first steps provide implications for initiating deep change that results in improved student learning outcomes even in challenging activity settings      *Constructing Educational Achievement* Sivaness Phillipson,Kelly Ku,Shane Phillipson,2014-06-03 International interest focuses on why pupils from East Asia tend to outperform pupils from the West and scholars have proposed a number of possible explanations to account for these international trends Using Vygotsky s theory 1978 as a conceptual framework to construct school achievement this book puts forward culturally relevant context for understanding developmental aspects of children s school achievement and their implication to classroom practice and education progress Converging the two important lines of inquiry the child factor and the sociocultural factor this book showcases evidence based scholarly works from across the globe that shed light on causes of academic achievement in different contexts The book brings together eminent scholars from early childhood primary education secondary and vocational education who expertly capture the vitality of development and processes of specific child factors and their interaction with their environment that explain their school achievement Foregrounded in the five planes of cultural historical institutional social personal and mental the research explain how children think learn and form the will to perform amidst the changing social and family environment and challenging school and educational environment      Schoolwide Action Research for Professional Learning Communities Karl H.
