by Kelly Hashway

Before planes, people traveled by boat. And getting goods from one place to another took a long time, especially when ships had to sail around continents. In the early 1600s, European trading companies were looking for faster routes to sail to India and Asia.

He arrived in the New York Harbor and sailed up a body of water that is now named the Hudson River. He thought the river might lead to the Pacific Ocean. But he was wrong, and he was forced to turn back to Europe. He had explored new lands, but did not find a route to Asia.

Hudson made one final attempt in 1610, on a new ship named *Discovery*. He sailed *Discovery* across the northern Atlantic, along the coast of Greenland, and into Canada. He discovered a large
