

Types of Clouds

There are many types of clouds. Each type is likely to bring different kind of weather. Weather is the condition of the atmosphere at a certain time and place.

Stratus clouds

- Stratus clouds are low sheets of gray clouds.
- They spread out and look like gray blankets covering the sky.
- Some stratus clouds bring rain.

Cumulus clouds

- Usually puffy and white
- You see them in big weather
- They are usually higher in the sky than stratus clouds.
- They are often spread out, with big spaces of blue sky between them.
- They can grow tall on a hot, sunny day.
- Sometimes they are dark, which bring rain, lightning and thunder.

Cirrus Clouds

- The highest clouds
- They are wispy and look a little like feathers in the sky.
- They form where the air is cold.
- They are made up of ice crystals.
- You see thin clouds in fair weather, but rainy weather often follows in a day or two.

At any time, clouds cover about one-half of earth, but all clouds are high in the sky. Fog is a cloud that is on or near the ground. If you have been outside on a foggy day, you have seen inside a cloud.
