Animal & Plant Life Cycles

Animal and Plant Life Cycles

Butterfly Scavenger Hunt

Some animals go through a simple life cycle and some go through a more complex cycle called metamorphosis.

Simple Life Cycle

Mammals, birds, reptiles and most fish have simple life cycles. They lay eggs or are born, then they grow and become an adult, like the fish or the bird. You will notice that in the case of both the bird and the fish, the young are similar to the adult. There are not major changes in the shape of their bodies.

Metamorphosis

Amphibians, which include frogs, toads, salamanders and newts, all go through metamorphosis. Here is the life cycle of a frog. Notice that after it hatches and swims in the water, after several changes it transforms to a legged animal that can survive on land for periods of time. This is a transformation. Butterflies also go through metamorphosis. They start as an egg and go through several stages to become an adult butterfly.
