

#### Ch. 54: Ecosystems Review Guide Answer Key

1. An ecosystem is the living (biotic) and nonliving (abiotic) parts that interact in an area.
2. All energy comes from the sun. Light energy is converted to chemical through photosynthesis and passed through the ecosystems as organisms eat each other (food web). Energy is lost in the form of heat.
3. Energy flows through an ecosystem and matter cycles.
4. Both energy and matter can be neither created nor destroyed.
5. Primary Producers (or Autotrophs)
6. Plants, some protists, some bacteria
7. Archaea
8. Trophic levels are the different levels of food/energy production and consumption: producer, primary consumer (herbivore), secondary consumer (omnivore or carnivore), etc. The first trophic level is always primary producers.
9. Detritivores are organisms that consume detritus (dead things, feces, etc) and recycle nutrients to the soil/water. Examples include earthworms, fungi, some bacteria, and slugs.
10. Cow: primary consumer/herbivore, grass: producer, human: secondary consumer (omnivore), mushroom: detritivore (decomposer)
11. Primary production is the amount of light energy converted to chemical energy by autotrophs during a given time period for a given area. Gross primary production is the total energy conversion; net primary production is the total minus the energy used for respiration by the primary producers (remember plants have mitochondria too!).
12.  $NPP = GPP - R$
13. Ecologists measure net primary production to calculate the amount of growth in an ecosystems. If the net production is positive, the ecosystem is healthy and growing. If it is negative, the ecosystem is unbalanced and declining.
14. A tropical forest would have more biomass per unit area because it has a higher density of living organisms than a desert.
15. We can measure the change in the ratio of CO<sub>2</sub> to O<sub>2</sub> gas dissolved in the water in a closed system. Sorry, we won't actually be doing this lab in class.
16. Primary productivity in aquatic ecosystems is limited by sunlight availability (murkiness of the water) and by limited nutrients available in the water or sand.
17. A limiting nutrient is the nutrient in shortest supply relative to what the plants need to grow. For example there may be plenty of nitrogen but not enough phosphorous for plants to keep growing. In that case phosphorous is the limiting nutrient. Off of Long Island, the limiting nutrient is nitrogen. In the Sargasso Sea, the limiting nutrient is iron.
18. Common sources of nitrates and phosphates are fertilizers added to farms.
19. Eutrophication is the process in which nutrients are added to a nutrient-poor body of water, therefore greatly increasing primary production. The main factor contributing to eutrophication is nutrient availability, but sunlight and temperature also play a part.

Lynn Wingard,Chris Schneider,Gregory P. Dietl ,Damien Fordham, Policy makers and resource managers must make decisions that affect the resilience and sustainability of natural resources including biodiversity and ecosystem services However these decisions are often based on evidence or theory derived from highly altered systems and over short time periods of low magnitude environmental and climatic change Because natural systems change and evolve across multiple timescales from instantaneous to millennial long term understanding of how past life has responded to perturbations can inform resource managers By using these natural laboratories of the past conservation paleobiology and paleoecology provide the framework necessary to anticipate and plan for future changes The goal of this Research Topic is to heighten awareness among conservation and restoration practitioners to the value and applications of long term perspectives provided by conservation paleobiology and paleoecology Most conservation studies focus on systems already impacted by anthropogenic change these studies would benefit from paleontological data through expanded temporal scales identification of baselines and an understanding of how organisms have responded to past changes However resource management decisions rarely include input from paleontologists and paleoecological research is rarely incorporated into conservation

decision making We seek to bridge this research implementation gap by highlighting the application of paleoecological data to issues such as biodiversity dynamics extinction risks and resilience to perturbations among other topics We hope to foster new cross disciplinary synergies by encouraging conservation scientists and managers to collaborate with paleontologists to improve conservation decision making and by increasing awareness among paleontologists to the needs of the resource management community This Research Topic will provide a forum for both the paleontological and resource management communities to exchange ideas that will enhance restoration and conservation decision making We invite papers on conceptual advances reviews of specific topics to guide efforts in research or practice case studies of successful applications articles describing datasets with applied value and perspective papers summarizing a body of paleontological research with relevance to the resource management community Topics can include but are not limited to Responses of species communities and ecosystems to perturbations Strategies to achieve the direct integration of paleobiology and paleoecology into on ground resource management Identifying baselines and reference conditions Increasing the robustness of forecasting models through the incorporation of paleontological data Identifying key species interactions and other phenomena as indicators of impending change New methodologies analytical tools and or proxies in the application of paleontological data to conservation and restoration practice Lynn Wingard Damien Fordham and Greg Dietl have no conflicts of interest Chris Schneider has a potential conflict of interest where manuscripts pertain to stakeholders in the petroleum industry as she is an independent contractor in the Alberta Oil Sands mining area

## **54 Ecosystems Guide Answer Introduction**

In today's digital age, the availability of 54 Ecosystems Guide Answer books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of 54 Ecosystems Guide Answer books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of 54 Ecosystems Guide Answer books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing 54 Ecosystems Guide Answer versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, 54 Ecosystems Guide Answer books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing 54 Ecosystems Guide Answer books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for 54 Ecosystems Guide Answer books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students.

and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, 54 Ecosystems Guide Answer books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of 54 Ecosystems Guide Answer books and manuals for download and embark on your journey of knowledge?
