5 In Five Bedmar And Shi

Antonio Trincone

5 In Five Bedmar And Shi:

5 in Five Oscar Riera Ojeda, 2011 Over the last five years Singapore based architect Ernesto Bedmar has been travelling to Thailand India Indonesia Singapore and New Zealand This gave him the opportunity to learn about the diversity of the geographical and cultural background to explore new ideas and to build a house in each of the five countries 5 in Five Second Oscar Riera Ojeda, 2015-03-01 In this captivating collection of five houses built in five different Asian Pacific countries Argentinian born designer Ernesto Bedmar explores his fascination with traditional architectural styles and reinvents them for the contemporary world Using his deep understanding of the histories and building cultures of these regions Bedmar seamlessly knits his designs into the collective memory of each site The five houses located in India Thailand Singapore Indonesia and New Zealand demonstrate the flexibility of the designer's trademark tropical architecture and showcase a diverse set of modern forms that resonate deeply with the local landscape and make use of water as a unifying and harmonizing element The book contains a wealth of drawings and plans that detail the innovative construction techniques and the resulting houses are captured in a breathtaking series of photographs showing the use of spaces and materials as well as the spectacular sites on which they sit Archinesia 04 Imelda Akmal (Editor in Chief), 2013-01-01 Cross Border Architecture **Modern Thai House** Robert Powell, 2012-10-10 With rich photography and insightful commentary this Thai architecture and interior design book showcases some of the finest modern masterpieces in Southeast Asia A tremendous body of sophisticated and sensitively designed architectural work has been produced in Thailand in the first decade of the 21st century The 25 houses in The Modern Thai House illustrate the radical new ideas coming from a dynamic younger generation of architects who are producing work comparable with and sometimes even surpassing the very best architecture in the world Most of these architects were trained in the U S or U K and reflect not only American and European sensibilities but also affinities with their contemporaries in Asia including Japan China Singapore and Bali all hotbeds for innovation in modern design The houses in this book are readily accessible from Bangkok Phuket and Chiangmai They reflect a wide variety of concerns and solutions such as sustainability responses to climate strategies for cooling with minimal electricity openness versus security in a large metropolis such as Bangkok cultural sensitivity and responsiveness as evidenced in a three generation house built for a society in which the extended family is still prevalent and cultural memory as in the use of elements such as pilings verandahs and steeply pitched roofs with large overhangs that echo traditional Thai designs Nurtured by an increasingly knowledgeable and wealthy clientele modern architecture in Thailand is emerging with a variety of innovative architectural expressions **Singapore Business**, 1997 Avery Index to Architectural Periodicals, 2d Ed., Rev. and Enl Avery Library, 1996 *British Humanities Index*, 1994 **Enzymatic Technologies for Marine Polysaccharides** Antonio Trincone, 2019-04-08 The bioactivity potential of marine polysaccharides has long been considered an underexploited aspect These molecules found in seaweed microalgae bacteria and animal fish shellfish mollusks etc and

the derived oligosaccharides need to be explored thoroughly with an interdisciplinary approach They are an extraordinary source of chemical diversity and the literature highlights many applicative fields including the food industry cosmetics biomedicine agriculture environmental protection wastewater management etc More recently a new challenge has emerged the exploitation of marine biomass as the source of sustainable energy to participate in the future replacement of fossil resources Enzymatic Technologies for Marine Polysaccharides provides insight into the recent research developments of marine polysaccharides and their current and potential applications The first section of the book explores the diversity of marine polysaccharides from various angles including a description of the chemical complexity and current applications and new perspectives in food pharmaceutical cosmetics and biomaterials offered by recent research Efficient valorization of the marine polysaccharide biomass requires a rigorous analysis of the polysaccharides structure and their biological properties The second section of the book concerns the development of extraction techniques and the improvement of the methods aimed at the characterization of their structure and function Finally the third and last section of the book articulates the enzymatic technologies from the discovery of novel enzymes to their production pipelines related to the fields of biorefinery food pharmaceuticals and other fine chemicals Presents the latest research in marine oligosaccharides and polysaccharides Written by world class researchers in marine enzyme technology Discusses the latest developments in extraction methods Presents a detailed overview of enzymatic routes for modification production and synthesis of marine oligosaccharides Contains extensive references at the end of each chapter to enhance further study
