Grade Level: Kindergarten	Subject Area: Math
Lesson Title: Unit 1 – Introducing and Developing Numbers 0 - 5 and Counting to 30	Lesson Length: 15 days
THE TEACHING PROCESS	
Lesson Overview: This unit bundles student expectations that address the foundational skills for developing an understanding of numbers 0 – 5, counting forward and backward 0 – 5, cardinality, subitizing, conservation of set, comparing numbers and sets of objects using comparative language, and generating numbers or set of objects less than or greater than a given amount. This unit also includes the student expectation that addresses reciting numbers up to 30 when counting by ones beginning with any number. According to the Texas Education Agency, mathematical process standards including application, tools and techniques, communication, representations, relationships, and justifications should be integrated (when applicable) with content knowledge and skills so that students are prepared to use mathematics in everyday life, society, and the workplace.	
Unit Objectives: Students will... ● Use sets of objects up to 5 to develop an understanding of the concepts of cardinality, meaning that the last number said when counting a set of objects names the number of objects, hierarchical inclusion, meaning each prior number in the counting sequence is included in the set as the set increases, and conservation of set, meaning if the same number of objects are counted and then rearranged, the quantity of objects in the set does not change. Students apply cardinality, hierarchical inclusion, and conservation of set as they begin to grasp the true meaning of numbers. ● Count forward and backward to 5 <u>with and without objects</u>, as well as read, write, and represent the numbers. ● Compose and decompose numbers up to 5 using objects and pictures which parallels the development of subitizing, meaning instantly recognizing the number being represented by a small quantity of objects in random and organized arrangements. Students apply all of these skills as they consider magnitude, or relative size, to compare sets of objects up to 5 and generate a set of objects and pictures that is more than, less than, or equal to a given number. ● Use comparative language to describe the comparison of numbers represented using objects, pictures, or numerals. When given a number up to 5, students are expected to generate a number that is one more than or one less than a given number. ● Recite numbers up to 30 by ones beginning with any number. Practice with rote reciting of numbers and learning the correct sequence of numbers aids in
