5e Lesson Plan For Kinder:

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

Teaching English Learners in Inclusive Classrooms Elva Duran, 2020-08-11 This newly revised text *Teaching English Learners in Inclusive Classrooms* updates and expands upon issues of great concern to those working with students who are English learners as well as having special learning challenges. Given the unacceptable school drop-out rates of these students, this book provides practical tools and strategies for educators to approach the unique learning needs of these students. It draws upon the most current laws and research in the interconnected fields of bilingual and multicultural education, language and literacy, and special needs. Additionally, Dr. Duran draws upon her extensive experiences via classroom teaching, university-level instruction, and textbook writing in these fields to present a highly useful compendium of ideas. The range of chapters exemplifies the width and breadth of this material. A sampling of these chapters includes topics such as functional language teaching, students with more extensive needs, working with cross-cultural and linguistically diverse students in the U.S. and Central America, helping students with autism, and includes information in the area of transition for mild/moderate and students with more extensive needs. There is also information as before on literacy and a chapter in the content subjects as it relates to social studies as well as a chapter on families of cross-cultural students. Many of the chapters look to use of direct instruction approaches that have proven to be successful strategies in addressing these educational areas. Teachers and teacher trainers will find this clear, well-written text to be an invaluable resource in addressing the needs of myriad and unique students.
