The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic

program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before Brown v Board of Education, Schenley succumbed to default segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008 citing over 50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school. A memorable important work of local and educational history, his book is a case study of desegregation, magnet education and the changing nature and legacies of America's oldest public schools.

Lessons in Organising Gawain Little, Ellie Sharp, Howard Stevenson, David Wilson, 2023-03-20. A vital work on labour movement strategy by experienced union activists. An excellent review of the attack on teachers and their unions by authors well placed to point to ways to improve the fight back and resistance. Kevin Courtney, Joint General Secretary NEU. The heart of any trade union is its reps and activists organizing in the workplace. After years of membership decline across sectors, a renewed recognition of this essential fact is behind the turn to organizing in the union movement today. This turn to collective organizing builds strength at a local as well as a national level and also aids in mobilizing around a wider range of political issues from campaigning against austerity to taking action for the environment. In recent years, this fusion of workplace organizing and national campaigning has been exemplified by Europe's largest education trade union, the National Education Union (NEU). In *Lessons in Organising*, the authors bring together activist, academic and union official perspectives to assess the potential and the limitations of the turn to organizing and set out the case for a new transformative trade unionism for the 21st century.

Science and Faith in Dialogue Frederik van Niekerk, Nico Vorster, 2023-03-01. *Science and Faith in Dialogue* presents a cogent, compelling case for concordance between science and theism. The term theism refers in this book to the belief in God's existence. Within theology, the term theism is often used to convey a range of presuppositions about the nature and attributes of God. Based on scientific and natural theological perspectives, two pillars of natural theology are revisited: the Cosmological Argument and the Argument from Design. The book argues that modern science provides undeniable evidence and a scientific basis for these classical arguments to infer a rationally justifiable endorsement of theism as being concordant with reason and science. Nature is seen as operating orderly on comprehensible, rational, consistent laws in line with the conviction that God is Creator.

How to Improve Neuroscience Education for the Public and for a Multi-Professional Audience in Different Parts of the Globe Analía Arévalo, Guilherme Lepski, Valeria Abusamra, 2022-08-18. *The Dynamics of Opportunity in*

America Irwin Kirsch, Henry Braun, 2016-01-22 Across the country our children are beginning life from very different starting points Some have aspirations and believe they can be achieved For too many others aspirations are tempered if not dashed by the sobering realities of everyday life These different starting points place children on distinctly different trajectories of growth and development ultimately leading to vastly different adult outcomes How did we get to a place where circumstances of birth have become so determinative And what must we do within communities and across our country to better equalize opportunity for more Americans both young and old The editors of this volume contend that if as a nation we do nothing then we will continue to drift apart placing an unsustainable strain on the nation s social fabric and the character of its democracy Consequently understanding the dynamics governing the distribution and transmission of opportunity and transforming this understanding into policies and programs is critical for not only the life outcomes of individual Americans and their children but also the country as a whole The goal of Educational Testing Service s Opportunity in America initiative is to explore these powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must take action and how best to do so This volume contains 14 chapters including an epilogue written by leaders from a range of fields including education economics demography and political science Collectively they not only illuminate key aspects of the problem but also offer suggestions of what policies programs and changes in practices could begin to reverse the trends we are seeing Written in an engaging style this volume constitutes an essential foundation for informed discussion and strategic analysis Nuclear Science Abstracts ,1976
