future of space **Criminalized Lives** Alexander McClelland, 2024-06-14 Canada has been known as a hot spot for HIV criminalization where the act of not disclosing one's HIV positive status to sex partners has historically been regarded as a serious criminal offence. *Criminalized Lives* describes how this approach has disproportionately harmed the poor Black and Indigenous people, gay men and women in Canada. In this book, people who have been criminally accused of not disclosing their HIV positive status detail the many complexities of disclosure and the violence that results from being criminalized. Accompanied by portraits from artist Eric Kostiuk Williams, the profiles examine whether the criminal legal system is really prepared to handle the nuances and ethical dilemmas faced everyday by people living with HIV. By offering personal stories of people who have faced criminalization first hand, Alexander McClelland questions common assumptions about HIV, the role of punishment and the violence that results from the criminal legal system's legacy of categorizing people as either victims or perpetrators. Note: A regrettable error appears on page 22. The number 240 should be 206 when referring to the number of people prosecuted in relation to allegations of HIV nondisclosure. This will be fixed in future reprints.

The Corpses of Times Generations Richard J. Koscijew, 2014-01-27 Anyone who has ever tried to present a rather abstract scientific subject in a popular manner knows the great difficulties of such an attempt. Either he succeeds in being intelligible by concealing the core of the problem and by offering to the reader only superficial aspects or vague allusions, thus of deluding the reader by arousing in him the deceptive illusion of comprehension. Or else he gives an expert account of the problem but as the untrained reader is unable to follow the exposition and becomes discouraged from reading any further. If these two categories are omitted from today's popular scientific literature, surprisingly little remains. But the little left is very valuable indeed. It is very important that the public is given an opportunity to experience consciously and intelligently the efforts and results of scientific research. It is not sufficient that each successive progression is taken up, elaborated and applied by a few specialists in the field. Restricting the body of knowledge to a small group deadens the philosophical spirit of these people and leads to spiritual poverty. *THE CORPSES OF TIMES GENERATIONS* represents a valuable contribution to popular scientific writing. The main ideas to Theory are extremely well presented. Moreover, the presents state of our knowledge in which the paradigms of science are aptly characterized. Mr Koscijew shows how the critical growth of our factual knowledge with the striving for a unified conception comprising all empirical data has led to the present situation which is characterized despite all successes by an uncertainty concerning the choice of the basic theoretical concept.

The science of mind has grown rapidly since the mid twentieth century. There is now a sizeable body of empirical knowledge concerning the structures and processes of neurophysiological studies which are underpinning e.g. thoughts, sensations, and emotions. More generally, the interdisciplinary fields of thought are burgeoning on several fronts. Contemporary philosophical reflection about mindful inquiries is quite intensive. Nonetheless, the philosophy of mind as an aspect of reality and the faculty of thinking, reasoning, and applying knowledge for the principle of intelligence commits to the consciousness that brings of an object or idea to mind. If not only to become aware as these liberating features are shielded away from writings that are heavy in formalism and dense argumentation. However, from an opened to a closed condition, we are found of a dilemma that much has been taken for granted and accepted for what it is. That there is some hope of gathering from the discerning fundamentals a reservoir of continuative phenomenon for which of us are to discover or rediscover that there are no radical dissimilarities in qualities or quantitative differences from those in vogue of previous eras as perhaps their lives existed for whatever the changelessness of self-mesmerizing amplification were to succumb of a life that simply is. Or should it be said do we live of our lives in the way that should be. **The Saturday Review of Politics, Literature, Science and Art**, 1863
