Driver Distraction Michael A. Regan, John D. Lee, Kristie Young, 2008-10-15 Certain activities and events both inside and outside a vehicle can distract drivers and lead to degraded performance. New technologies such as entertainment, communication, and driver assistance systems play a significant role in distraction. This unique volume defines driver distraction, discusses various causes, and explains how to measure acceptable and unacceptable levels of distraction. Several chapters address measurement techniques based on performance and epidemiological studies. Most importantly, the text explores ways to mitigate driver distraction as well as countermeasures including vehicle design and effective legislation.

Knowledge Sharing in the Integrated Enterprise Peter Bernus, Mark Fox, 2005-09-20 Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice. It is widely recognized that the practice of engineering enterprises needs a number of models, but how to maintain the relation between these models with ease is still a problem. Model interoperability is an issue on multiple counts. How to interchange models between enterprise modeling tools. How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity. How to maintain a coherent and evolving set of enterprise models in support of continuous change processes. How to use and reuse enterprise models as a knowledge resource. The answers to these questions are of great importance to anyone who is implementing ISO9001:2000 requirements, whether through using enterprise architecture practice or not. Although it can be argued that a well-executed architecture practice should satisfy ISO9001 without additional effort, this volume attacks the problem on three fronts:

1. Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration.
2. Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies.
3. Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration.

Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for
