The Imperial Discipline Alexander E Davis, Vineet Thakur, Peter Vale, 2020-11-20 This book questions the accepted origins of the field of International Relations IR Commonly understood to have emerged from the horrors of WW1 with the goal of bringing about world peace the authors argue that on the contrary IR came from a somewhat less noble tradition that of the Round Table The Round Table were a network of imperialists emerging in the late 1800s across five key British imperial societies Australia Canada New Zealand South Africa and India Their aim was to improve imperial governance placing the empire into a position to control world affairs Although they ultimately failed to rearrange world order according to their vision they did help to build what we now call the discipline of IR The Round Table's scientific method for the study of world affairs was rapidly subsumed into each geopolitical context Through telling this story the authors recover it and interrogate its meanings for the discipline of IR today They show the importance of the Global South to IR's foundations and argue that IR scholarship in this period was intertwined with imperial racial thought in ways that it should not and cannot forget

The Golden Thread Fuad Udemans, 2013 This book is an account of a ten year experiment whereby the scientist became an entrepreneur so as to experience his own theoretical model applied in a live social system society Profit motives and the clinical nature of science became muddled with norms

rules and laws of social systems and how different people applied and responded to these rules The insights to be gained from this journey are often surprising The book highlights many counter intuitive outcomes It also reveals how certain individuals interpret society s rules and norms despite their design to ensure fair and equitable social systems Indeed the manipulation of social laws and standards by those with strong fields of power is self evident and it is explored in a unique manner Understanding how the field of power can be manipulated suggests that no matter how bleak one s current position may be it is very possible and relatively easy to escape conditions of poverty oppression and subjugation vital issues that citizens in all countries face today *Library of Congress Catalog* Library of Congress,1970 A cumulative list of works represented by Library of Congress printed cards *Scientists in the Classroom* J.
