In an ageing world a better and deeper understanding of the senior segment is crucial This thesis focuses in the study of the senior tourism a topic that has been receiving increasing attention in literature due to its growth potential and the specificities that seniors can present in their way of consuming tourism and leisure travelling The first few years of the 21st millennium have brought extraordinary change and transformation in destination planning and management It is obvious that the increasing importance of the tourism industry needs an improvement in knowledge for this important segment so as to be

able to tailor offerings to senior cohort groups The overall aim of this study is to understand how seniors want to travel and to determine the trends forces in play and key preferences that may affect the way that seniors will consume tourism in the future The tourism industry must be attentive to the senior market because of the rapid increase in this market s size in an ageing society and the changes in the way they are consuming products and services Sophistication should be further explored and opportunities provided to better anticipate maximize and genuinely understand the needs wants concerns preferences and insights of this heterogeneous segment of the population

*Calculus for the Life Sciences: A Modeling Approach* James L. Cornette, Ralph A. Ackerman, 2019-05-25 Calculus for the Life Sciences is an entire reimagining of the standard calculus sequence with the needs of life science students as the fundamental organizing principle Those needs according to the National Academy of Science include the mathematical concepts of change modeling equilibria and stability structure of a system interactions among components data and measurement visualization and algorithms This book addresses in a deep and significant way every concept on that list The book begins with a primer on modeling in the biological realm and biological modeling is the theme and frame for the entire book The authors build models of bacterial growth light penetration through a column of water and dynamics of a colony of mold in the first few pages In each case there is actual data that needs fitting In the case of the mold colony that data is a set of photographs of the colony growing on a ruled sheet of graph paper and the students need to make their own approximations Fundamental questions about the nature of mathematical modeling trying to approximate a real world phenomenon with an equation are all laid out for the students to wrestle with The authors have produced a beautifully written introduction to the uses of mathematics in the life sciences The exposition is crystalline the problems are overwhelmingly from biology and interesting and rich and the emphasis on modeling is pervasive An instructor s manual for this title is available electronically to those instructors who have adopted the textbook for classroom use Please send email to [textbooks@ams.org](mailto:textbooks@ams.org) for more information Online question content and interactive step by step tutorials are available for this title in WebAssign WebAssign is a leading provider of online instructional tools for both faculty and students

### **Geomicrobes: Life in Terrestrial Deep**

**Subsurface** Malin Bomberg, Lasse Ahonen, 2017-07-17 The deep subsurface is in addition to space one of the last unknown frontiers to human kind A significant part of life on Earth resides in the deep subsurface hiding great potential of microbial life of which we know only little The conditions in the deep terrestrial subsurface are thought to resemble those of early Earth which makes this environment an analog for studying early life in addition to possible extraterrestrial life in ultra

extreme conditions Early microorganisms played a great role in shaping the conditions on the young Earth Even today deep subsurface microorganisms interact with their geological environment transforming the conditions in the groundwater and on rock surfaces Essential elements for life are richly present but in difficultly accessible form The elements driving the microbial deep life is still not completely identified Most of the microorganisms detected by novel molecular techniques still lack cultured representatives Nevertheless using modern sequencing techniques and bioinformatics the functional roles of these microorganisms are being revealed We are starting to see the differences and similarities between the life in the deep subsurface and surface domains We may even begin to see the function of evolution by comparing deep life to life closer to the surface of Earth Deep life consists of organisms from all known domains of life This Research Topic reveals some of the rich diversity and functional properties of the great biomass residing in the deep dark subsurface

**Value Chains in Sub-Saharan Africa** Sören Scholvin,Anthony Black,Javier Revilla Diez,Ivan Turok,2019-05-09 Development largely depends on how given places participate in global economic processes The contributions to this book address various features of the integration of sub Saharan Africa into the world economy via value chains so as to explain corresponding challenges and opportunities The book deals with five issues that have not been covered adequately in scientific debates first policies are essential to promote value chains and increase their impact on development second value chains are diverse and the variance between them has major economic and political implications third regional value chains appear to constitute a viable alternative to global ones or at least are complementary to them promising better developmental outcomes for the Global South fourth political and socio economic factors are important considerations for a complete assessment of value chains fifth cities and city regions are also crucial objects of study in seeking to achieve a comprehensive assessment of value chains

**THE MAGNIFICENCE OF THE 3** Timeout A. Taumua,2023-10-05 Greetings The THE MAGNIFICENCE OF THE 3 title was extracted from a quote attributed to the legendary NIKOLA TESLA stating that If you only knew the magnificence of the 3 6 and 9 then you would have the key to the universe The magnificence of the three as I claim was a reference to the atom s three particles Yes I found the ATOM in the Torah If you know then you know the implications As I followed its tracts to the New Testament God revealed to me the identities of the Tree of Knowledge Tree of Life Garden of Eden and the Ark of the Testimony along the way Scientists define their design and purposes without understanding and inadvertently reveal God s hidden treasures Come review the record for yourself and for your elders before they move on You will never fully know God until you know what this Garden is and its Trees God s design is a thing of beauty and it cannot be accessed with faith So enjoy and meet God the Scientist Creator of Heaven and Earth

*The Common Good and Ecological Integrity* Laura Westra,Janice Gray,Antonio D'Aloia,2016-05-20 Proponents of the concept of ecological integrity argue that it is a necessary component of global governance on which the sustainable future of the planet and its inhabitants depends This book presents the latest research and current thinking on the role of ecological integrity in support of life on Earth and the importance of

governance for the common good or the benefit of all The book considers whether present forms of governance support the common good or whether they are endangering its very foundations It explores the connection between consumerism and capitalism the destruction of natural resources and with it the elimination of many of the ecosystem services that support life in general and human life in particular Chapters focus on the defence of human rights and in particular the rights to key resources such as food water and general health wellbeing as well as energy and security Topics covered include climate change biodiversity migration and conflict resolution with approaches from various perspectives such as politics ethics sociology and law Overall the book provides a stimulating insight into the multifaceted debates surrounding ecological integrity global governance and sustainability
