Mathematics (Education) in the Information Age Stacy A. Costa,Marcel Danesi,Dragana Martinovic,2020-12-10 This book brings together ideas from experts in cognitive science mathematics and mathematics education to discuss these issues and to present research on how mathematics and its learning and teaching are evolving in the Information Age Given the ever broadening trends in Artificial Intelligence and the processing of information generally the aim is to assess their implications for how math is evolving and how math should now be taught to a generation that has been reared in the Information Age It will also look at the ever spreading assumption that human intelligence may not be unique an idea that dovetails with current philosophies of mind such as posthumanism and transhumanism The role of technology in human evolution has become critical in the contemporary world Therefore a subgoal of this book is to

illuminate how humans now use their sophisticated technologies to chart cognitive and social progress Given the interdisciplinary nature of the chapters this will be of interest to all kinds of readers from mathematicians themselves working increasingly with computer scientists to cognitive scientists who carry out research on mathematics cognition and teachers of mathematics in a classroom

Biopolymer Thin Films and Coatings Stefan Spirk,Tiina Nypelö,Eero Kontturi,2020-01-10 In science as well as in industry the impetus of research on bio based polymers has recently expanded into new terrains The need to replace fossil based materials with sustainable and renewable sources is one of the main drivers for the emergence and the development of new and environmentally friendly materials While some materials applications of bio based polymers are already very well established for instance in paper and textiles others have just emerged with thin films and coatings being a recent and particular area of interest Thin films in general are an enormous field of research both fundamentally and from an applied perspective with uses ranging from corrosion resistance to photovoltaics and sensors Since bio based materials are a relatively novel source material for thin films the research in this area is at a fresh exciting stage at the moment
