Faba Bean Improvement G. Hawtin,Colin Webb,2012-12-06 Faba beans formerly known as broad beans are among the oldest crops in the world It has in fact been claimed with some justification that the Pyramids were built on faba beans They are today a major crop in many countries such as China Egypt and the Sudan and are widely grown for human food throughout the Mediterranean region in Ethiopia and in parts of Latin America In recent years there has been a growing interest in faba bean production as a protein source for stock feed in parts of Europe North America and Australia The publication served by this preface arose from the first International Faba Bean Conference held in Cairo Egypt on March 7

11 1981 which provided a suitable forum for the review of many scientifically important aspects of the improvement of the crop. Leading faba bean specialists from four continents who participated were able not only to contribute from their personal expertise in relevant subjects but in return to gain from their experience of Nile Valley conditions and from close contact with so many of the world's faba bean scientists. The conference was supported in the main by the ICARDA/JIFAD Nile Valley Faba Bean Project. Additional support was received from a number of other organisations and institutions whose help is gladly acknowledged. These included the Agricultural Research Council ARC of the Egyptian Ministry of Agriculture, G T Z of Germany, IDRC of Canada, the National Research Center of Egypt and Cairo University.
