

LIFE IN A GEOMETRICAL TOWN

Materials Needed:

One 12 inch x 18 inch paper, ruler, protractor, compass, straightedge, colored pencils, scissors, glue, 12 x 18 paper, construction paper

Before Class Begins:

1. Carefully read the directions through before beginning. To gain an understanding of what you are going to do.
2. Before creating your final project, make a rough draft of your map on standard paper. Use the rough draft to adjust and where things will go on the larger map (12 x 18 paper). Then use your rough draft as a guide to help you create your map. "Your rough draft doesn't do harm at all."
3. There are 10 neighborhoods. Each is worth 10 points, for a total of 100 points.

Directions/Steps:

1. Draw 3 parallel roads and name them. The roads can be used to make up the example of the Avenue, High Street, William (Main) Street. Your map will look much better if you use a ruler to draw the lines for your roads. Also make sure that all roads are the same width.
2. Draw 3 roads that are each perpendicular to at least one of the 3 parallel lines, and name these roads.
3. Draw 3 intersecting roads on your map. They may intersect each other, or any of the other roads. These roads intersect, but are not perpendicular. Name these roads.
4. Take a sheet of construction paper. Place your ruler diagonally on the paper. Mark at the 1", 1", and 1" measurements on both sides of the paper. Draw a straight line across the paper. Repeat this ruler across the top of your paper. Mark at the 1" and 1" measurements. The line goes to the bottom of the paper. Use these points to draw straight lines to a grid on the paper.

You should now have 12 squares on your sheet of construction paper that are each 1" x 1". You will use these squares to create 10 different polygon shapes, which you will cut out and glue onto your poster board. The shapes that you will need to create are:

Triangle	Square	Rectangle	Parallelogram	Pentagon
Pentagon	Hexagon	Octagon	Nonagon	Decagon

5. The polygons created in step 4 are the buildings in your town. Each building needs to have a mathematical name on the paper.
