Diagnostics for Flow Processes P. Buchhave, L. Lading, G. Wigley, 2013-11-11 The origin of optical methods for fluid flow investigations appears to be nontraceable This is no matter for surprise After all seeing provides the most direct and common way for humans to learn about their environment But at the same time some of the most sophisticated methods for doing measurements in fluids are also based on light and often laser light A very large amount of material has been published in this area over the last two decades Why then another publication Well the field is still in a state of rapid development It is characterised by the use of results and methods developed within very different areas like optical physics spectroscopy communication systems electronics and computer science mechanical engineering chemical engineering and of course fluid dynamics We are not aware of a book containing both introductory and more advanced material that covers the same material as presented here The book is the result of a compilation and expansion of material presented at a summer school on Optical Diagnostics for Flow Processes held at RiSO National Laboratory and the Technical University of Denmark in September 1993 The aim of the course was to provide a solid background for understanding evaluating and using modern optical diagnostic methods addressing Ph D students and researchers active in areas of fluid flow research The disciplines represented by the participants ranged from atmospheric fluid dynamics to biomedicine Leaving The Twentieth Century

McKenzie Wark, 2024-08-20 The acclaimed history of the groundbreaking Situationist movement The Situationist International which leaped to the fore during the Paris tumult of 1968 has extended its revolutionary influence right up to the present day In Leaving the Twentieth Century the movement is captured for the first time in its full range and diversity McKenzie Wark traces the group's development from the bohemian Paris of the 50s to the explosive days of May 68 She introduces the group as an ensemble revealing the work and activities of thinkers previously obscured by the reputation of founding member Guy Debord Roaming through Europe and exploring the vital lives its members including Constant Asger Jorn Mich le Bernstein Alexander Trocchi and Jacqueline de Jong Wark uncovers a group riven with conflicting passions She

follows the narrative beyond 1968 to the Situationists International's disintegration and beyond the ideas of T J Clark the Fourierist utopia of Raoul Vaneigem Ren Vignet's earthy situationist cinema Gianfranco Sanguinetti's pranking of the Italian ruling class Alice Becker-Ho's account of the anonymous language of the Romany and Debord's late films and his surprising work as a game designer

Democracy's Reconstruction Lawrie Balfour, 2011-02-11 In *Democracy's Reconstruction* the latest addition to Cathy Cohen and Fredrick Harris's *Transgressing Boundaries* series noted political theorist Lawrie Balfour challenges a longstanding tendency in political theory the disciplinary division that separates political theory proper from the study of black politics Political theory rarely engages with black political thinkers despite the fact that the problem of racial inequality is central to the entire

enterprise of American political theory To address this lacuna she focuses on the political thought of W E B Du Bois particularly his longstanding concern with the relationship between slavery s legacy and the prospects for democracy in the era he lived in Balfour utilizes Du Bois as an intellectual resource applying his method of addressing contemporary problems via the historical prism of slavery to address some of the fundamental racial divides and inequalities in contemporary America By establishing his theoretical method to study these historical connections she positions Du Bois s work in the political theory canon similar to the status it already has in history sociology philosophy and literature

Perceptual Linguistic Salience: Modeling Causes and Consequences Alice Blumenthal-Dramé,Adriana Hanulíková,Bernd Kortmann,2017-06-05 Recent years have seen an upsurge of interest in the notion of salience in linguistics and related disciplines While in top down salience perceivers endogenously direct their attention to a certain stimulus in the bottom up salience it is the stimulus itself which attracts attention In prototypical cases of bottom up salience the stimulus stands out because it is incongruous with a given ground by virtue of intrinsic physical characteristics But a stimulus may also cause surprise by virtue of deviating from a cognitive ground e g when violating social or probabilistic expectations This has prompted researchers to examine the relationship between expectations and the perceptual salience of linguistic stimuli in new ways This e book features contributions from different scientific frameworks The reader will find commentaries reviews and original research articles on models of sociolinguistic and morphological salience the role of attention affect and predictability and on how salient items are processed categorized and learned Taken together the articles in this volume contribute to our understanding of how the perceptual salience of linguistic forms and variants can be theoretically framed and methodologically operationalized in different areas of linguistic processing
