Perceptual Linguistic Salience: Modeling Causes and Consequences Alice Blumenthal-Dramé, Adriana Hanulíková, Bernd Kortmann, 2017-06-05 Recent years have seen an upsurge of interest in the notion of salience in linguistics and related disciplines While in top down salience perceivers endogenously direct their attention to a certain stimulus in the bottom up salience it is the stimulus itself which attracts attention In prototypical cases of bottom up salience the stimulus stands out because it is incongruous with a given ground by virtue of intrinsic physical characteristics But a stimulus may also cause surprise by virtue of deviating from a cognitive ground e g when violating social or probabilistic expectations This has prompted researchers to examine the relationship between expectations and the perceptual salience of linguistic stimuli in new ways This e book features contributions from different scientific frameworks The reader will find commentaries reviews and original research articles on models of sociolinguistic and morphological salience the role of attention affect and predictability and on how salient items are processed categorized and learned Taken together the articles in this volume contribute to our understanding of how the perceptual salience of linguistic forms and variants can be theoretically framed and methodologically operationalized in different areas of linguistic processing *Education Reimagined: The Impact of Advanced Technologies on Learning* Mohammad Khalil, Mohammed Saqr, Sonsoles López-Pernas, Isabel Hilliger, 2024-12-18 The last decade has seen significant progress in technology particularly in the fields of Artificial Intelligence and machine learning which have had a profound impact on numerous industries including education The integration of technology in education has fundamentally altered the landscape of learning where data becomes a crucial component to provide insights into for example how students learn when and where additional support is needed Employing educational data is proving to be a catalyst for innovation in education opening up new possibilities for students and educators alike The focus of this Research Topic is to explore the impact of recent technological innovations and advances such as AI AI powered Chatbots Learning Analytics Virtual and Augmented Reality and remote and virtual labs on different education systems both from the educational and the psychological perspective The scope is twofold on the one hand examining the use of these advanced technologies in learning and teaching activities and on the other hand teaching students about these technologies and understanding the impact of including them in new education policies and curricula including teaching of AI data science analytics and the ethical implications of data The Research Topic seeks to provide insightful and thought provoking perspectives on how technology is being utilized to enhance the learning experience for students of all ages Both in higher education and K12 education and their transition to higher education By gathering experts in psychology education and technology this Research Topic aims to present research findings and best practices and to stimulate discussions on the role of technology in shaping the future of education The ultimate objective is to inspire innovation and to improve the education of future generations through advanced technologies **The Spectacle of Disintegration** McKenzie Wark, 2013-03-12

Following his acclaimed history of the Situationist International up until the late sixties *The Beach Beneath the Street* McKenzie Wark returns with a companion volume which puts the late work of the Situationists in a broader and deeper context charting their contemporary relevance and their deep critique of modernity Wark builds on their work to map the historical stages of the society of the spectacle from the diffuse to the integrated to what he calls the disintegrating spectacle *The Spectacle of Disintegration* takes the reader through the critique of political aesthetics of former Situationist T J Clark the Fourierist utopia of Raoul Vaneigem Ren Vignet's earthy situationist cinema Gianfranco Sanguinetti's pranking of the Italian ruling class Alice Becker-Ho's account of the anonymous language of the Romany Guy Debord's late films and his surprising work as a game designer At once an extraordinary counter history of radical praxis and a call to arms in the age of financial crisis and the resurgence of the streets *The Spectacle of Disintegration* recalls the hidden journeys taken in the attempt to leave the twentieth century and plots an exit from the twenty first The dustjacket unfolds to reveal a fold out poster of the collaborative graphic essay combining text selected by McKenzie Wark with composition and drawings by Kevin C Pyle *Choice* ,2001 *Viva Life Orientation* A.
