Taking Back Philosophy Bryan W. Van Norden, 2017-12-05 Are American colleges and universities failing their students by refusing to teach the philosophical traditions of China India Africa and other non Western cultures This biting and provocative critique of American higher education says yes Even though we live in an increasingly multicultural world most philosophy departments stubbornly insist that only Western philosophy is real philosophy and denigrate everything outside the European canon In *Taking Back Philosophy* Bryan W Van Norden lambastes academic philosophy for its Eurocentrism insularity and complicity with nationalism and issues a ringing call to make our educational institutions live up to their cosmopolitan ideals In a cheeky agenda setting and controversial style Van Norden an expert in Chinese philosophy proposes an inclusive multicultural approach to philosophical inquiry He showcases several accessible examples of how Western and Asian thinkers can be brought into productive dialogue demonstrating that philosophy only becomes deeper as it becomes increasingly diverse and pluralistic *Taking Back Philosophy* is at once a manifesto for multicultural education an accessible introduction to Confucian and Buddhist philosophy a critique of the ethnocentrism and anti intellectualism characteristic of much contemporary American politics a defense of the value of philosophy and a liberal arts education and a call to return to the search for the good life that defined philosophy for Confucius Socrates and the Buddha Building on a popular New York Times opinion piece that suggested any philosophy department that fails to teach non Western philosophy should be renamed a Department of European and American Philosophy this book will challenge any student or scholar of philosophy to reconsider what constitutes the love of wisdom

Charged Particles in Oncology Marco Durante, Francis A. Cucinotta, Jay S. Loeffler, 2018-01-31 High energy charged particles represent a cutting edge technique in radiation oncology Protons and carbon ions are used in several centers all over the world for the treatment of different solid tumors Typical indications are ocular malignancies tumors of the base of the skull hepatocellular carcinomas and various sarcomas The physical characteristics of the charged particles Bragg peak allow sparing of much more normal tissues than it is possible using conventional X rays and for this reason all pediatric tumors are considered eligible for protontherapy Ions heavier than protons also display special radiobiological characteristics which make them effective against radioresistant and hypoxic tumors On the other hand protons and ions with high charge Z and energy HZE particles represent a major risk for human space exploration The main late effect of radiation exposure is cancer induction and at the moment the dose limits for astronauts are based on cancer mortality risk The Mars Science Laboratory MSL measured the dose on the route to Mars and on the planet's surface suggesting that a human exploration missions will exceed the radiation risk limits Notwithstanding many studies on carcinogenesis induced by protons and heavy ions the risk uncertainty remains very high In this research topic we aim at

gathering the experiences and opinions of scientists dealing with high energy charged particles either for cancer treatment or for space radiation protection Clinical results with protons and heavy ions as well as research in medical physics and pre clinical radiobiology are reported In addition ground based and spaceflight studies on the effects of space radiation are included in this book Particularly relevant for space studies are the clinical results on normal tissue complications and second cancers The eBook nicely demonstrates that particle therapy in oncology and protection of astronauts from space radiation share many common topics and can learn from each other

Trans Rogers Brubaker, 2023-04-06 2015 kurz nachdem sich Caitlyn Jenner zu ihrer Identität als Transgender bekannt hatte wurde Rachel Dolezal Präsidentin einer Ortsgruppe der National Association for the Advancement of Colored People NAACP durch ihre Eltern als weiss geoutet Darauf entbrannte in den Medien eine Debatte über die Fluidität von gender und race Wenn Jenner sich rechtmässig als Frau identifizieren konnte konnte sich Dolezal nicht ebenso als schwarz identifizieren Obwohl sex im Unterschied zu race eine biologische Fundierung hat findet die Wahl bzw. Änderung von sex oder gender paradoxerweise eine grössere Akzeptanz als die Wahl oder Änderung der race Während Dolezals Behauptung sie sei schwarz von wenigen akzeptiert wurde verstärkt sich die Fluidität von Race Identitäten in der Masse wie die Abstammung zunehmend als gemischt verstanden ihre Vorherrschaft über Identität verliert und race und ethnicity wie auch gender als etwas gesehen werden was wir tun und nicht als etwas was wir haben Indem er race und ethnicity durch die Linse der Transgender Erfahrung neu betrachtet nicht nur als eine Bewegung von einer Kategorie zur anderen sondern auch als Position zwischen und jenseits von bestehenden Kategorien unterstreicht Brubaker die Formbarkeit Kontingenz und Beliebigkeit der Kategorien von race Ausgehend von der kontroversen Koppelung von transgender und transracial zeigt Rogers Brubaker wie

gender und race die während langer Zeit als stabil angeboren und unzweideutig verstanden werden in den letzten Jahrzehnten auf unterschiedliche Art und in unterschiedlichem Ausmass als wandelbar und einer Wahl zugänglich betrachtet werden Transgender Identitäten haben sich in schwindelerregendem Tempo von der Peripherie in den Mainstream bewegt und Grenzen der Ethnizität und der race wurden unscharf
