Pornography Lindsay Coleman, Jacob M. Held, 2014-09-08 For many individuals pornography is a troubling and problematic issue Regardless of how the public views this topic one thing is clear Pornography is as prevalent and accessible as smartphones and laptop computers Indeed beyond traditional hardcore material a pornographic sensibility permeates many aspects of culture from tween and young teen fashions to television and commercially successful films In fact pornography is

so widespread that more often than not it is taken as a given in our modern social space. However, the thought of engaging in intellectual discussions about the topic strikes many, particularly scholars, as beneath them. And yet, something this impactful, this definitive of modern culture, needs to be laid open to scrutiny. In *The Philosophy of Pornography: Contemporary Perspectives*, Lindsay Coleman and Jacob M. Held offer a collection of essays covering a wide range of viewpoints from issues of free speech and porn's role in discrimination to the impact of porn on sexuality. These essays investigate the philosophical implications of pornography as a part of how we now seek to conceive and express our sexuality in contemporary life. Contributors to this volume discuss pornography as a component of gender and sexual socialization, ecological understandings of sexually explicit media, subordination, sexualization, and speech feminism, and pornography's depiction of love and friendship, black women and pornography, playfulness and creativity in porn. Because its subject matter—sex, gender, interpersonal relationships, and even love—is reflective of who we are and what kind of society we want to create, pornography demands serious treatment. So whether one chooses to accept pornography as a fact of modern culture or not, this collection of timely essays represents a variety of voices in the ongoing debate. As such, *The Philosophy of Pornography* will be of interest to not only those who are engaged in porn studies but also to an audience educated in and conversant with recent trends in philosophy.

The Vaccine Race Meredith Wadman, 2017-02-09. SHORTLISTED FOR THE WELLCOME BOOK PRIZE. A GUARDIAN SCIENCE BOOK OF THE YEAR. Riveting, invites comparison to Rebecca Skloot's *The Immortal Life of Henrietta Lacks*. Nature: The epic and controversial story of a major breakthrough in cell biology that led to the conquest of rubella and other devastating diseases. Until the late 1960s, tens of thousands of children suffered crippling birth defects if their mothers had been exposed to rubella, popularly known as German measles, while pregnant. There was no vaccine and little understanding of how the disease devastated fetuses. In June 1962, a young biologist in Philadelphia produced the first safe, clean cells that made possible the mass production of vaccines against many common childhood diseases. Two years later, in the midst of a German measles epidemic, his colleague developed the vaccine that would one day effectively wipe out rubella for good. This vaccine and others made with those cells have since protected hundreds of millions of people worldwide; the vast majority of them, preschool children. Meredith Wadman's account of this great leap forward in medicine is a fascinating and revelatory read.

Global Justice and Finance Tim Hayward, 2019. Can global justice be promoted by distributing money more equitably? Mazmanian, 2020-06-09 A riveting look at the real reasons Americans feel inadequate in the face of their dreams and a call to celebrate how we support one another in the service of family and work in our daily life Jay's days are filled with back to back meetings but he always leaves work in time to pick his daughter up from swimming at 7pm knowing he'll be back on his laptop later that night Linda thinks wistfully of the treadmill in her garage as she finishes folding the laundry that's been in the dryer for the last week Rebecca sits with one child in front of a packet of math homework while three others clamor for her attention In *Dreams of the Overworked* Christine M Beckman and Melissa Mazmanian offer vivid sketches of daily life for nine families capturing what it means to live work and parent in a world of impossible expectations now amplified unlike ever before by smart devices We are invited into homes and offices where we recognize the crushing pressure of unraveling plans and the healing warmth of being together Moreover we witness the constant planning that goes into a good day often with the aid of phones and apps Yet as technologies empower us to do more they also promise limitless availability and connection Checking email on the weekend monitoring screen time and counting steps are all part of the daily routine The stories in this book challenge the seductive myth of the phone clad individual by showing that beneath the plastic veneer of technology is a complex hidden system of support our dreams being scaffolded by retired in laws friendly neighbors spouses and paid help This book makes a compelling case for celebrating the structures that allow us to strive for our dreams by supporting public policies and community organizations challenging workplace norms reimagining family and valuing the joy of human connection
