Seminar paper from the year 2014 in the subject Politics Region USA grade 1 3 course The Federalist language English abstract The significance of antiquity and of examples drawn from antiquity during the American founding era is contested among scholars While Hannah Arendt asserted that without the classical example the American revolutionaries conscious of emulating ancient virtue would not have had the courage to rebel Bernard Bailyn famously suggested that frequent references to antiquity were merely illustrative not determinative of revolutionary thought As familiarity with antiquity was evident during the Revolutionary War it is less clear what role it played in the construction of the new American regime under the constitution of 1787 a time during which not virtuous warfare but positive political philosophy was called for Hence a thorough examination of The Federalist shall serve to illuminate the extent to which the founding generation s political science was inspired by ancient precedent resulting in the conclusion that examples drawn from antiquity did not supersede those drawn from other periods in human history and that therefore no unique or special status can be ascribed to antiquity in this context Genetically Modified Foods Salah E. A Land Won from Waste Richard D. Oram,2025-04-17 Drawing together the evidence of archaeology palaeoecology climate history and the historical record this first environmental history of Scotland explores the interaction of human populations with land waters forests and wildlife This volume takes the reader from the climatic highs of the Late Iron Age to the depths of the war torn and plague ravaged fourteenth century Departing from traditional frameworks that divide Scotland s history into periods based on kings reigns or major political events discussion instead follows the major shifts in climate that divide these fourteen centuries into epochs each with its own distinct characteristics Starting amidst the fields and forests shaped across the eight millennia of Scotland s prehistory where we encounter the imprint of past generations of hunters and gatherers farmers and fishermen as well as the legacies of climate impacts and pathogens the book explores the depths of the Late Antique Little Ice Age and the long climb back to the Golden Age of the twelfth and thirteenth century Medieval Climate Anomaly to end with the slide through crop failure famine war and disease of what is reputed to be the worst century in human history Where Ideas Go to Die Michael McDevitt (Professor of journalism),2020 Ideas die at the hands of journalists This is the controversial thesis offered by Michael McDevitt in a sweeping examination of anti intellectualism in American journalism A murky presence anti intellectualism is not acknowledged by reporters and editors It is not easily measured by scholars as it entails opportunities not taken context not provided ideas not examined Where Ideas

Go to Die will be the first book to document how journalism polices intellect at a time when thoughtful examination of our society's news media is arguably more important than ever. Through analysis of media encounters with dissent since 9/11, McDevitt argues that journalism engages in a form of social control routinely suppressing ideas that might offend audiences. McDevitt is not arguing that journalists are consciously or purposely controlling ideas but rather that resentment of intellectuals and suspicion of intellect are latent in journalism and that such sentiment manifests in the stories journalists choose to tell or not to tell. In their commodification of knowledge, journalists will, for example, clarify ideas to distill deviance, dismiss nuance as untranslatable, and funnel productive ideas into static partisan binaries. Anti-intellectualism is not unique to American media. Yet McDevitt argues that it is intertwined with the nation's cultural history and consequently baked into the professional training that occurs in classrooms and newsrooms. He offers both a critique of our nation's media system and a way forward to a media landscape in which journalists recognize the prevalence of anti-intellectualism and take steps to avoid it and in which journalism is considered an intellectual profession.

The Animals' Agenda Marc Bekoff, Jessica Pierce, 2017-04-18. A compelling argument that the time has come to use what we know about the fascinating and diverse inner lives of other animals on their behalf. Every day we are learning new and surprising facts about just how intelligent and emotional animals

are did you know rats like to play and laugh and also display empathy and the ears and noses of cows tell us how they re feeling At times we humans translate that knowledge into compassion for other animals think of the public outcry against the fates of Cecil the lion or the captive gorilla Harambe But on the whole our growing understanding of what animals feel is not resulting in more respectful treatment of them Renowned animal behavior expert Marc Bekoff and leading bioethicist Jessica Pierce explore the real world experiences of five categories of animals beginning with those who suffer the greatest deprivations of freedoms and choice chickens pigs and cows in industrial food systems as well as animals used in testing and research including mice rats cats dogs and chimpanzees Next Bekoff and Pierce consider animals for whom losses of freedoms are more ambiguous and controversial namely individuals held in zoos and aquaria and those kept as companions Finally they reveal the unexpected ways in which the freedoms of animals in the wild are constrained by human activities and argue for a more compassionate approach to conservation In each case scientific studies combine with stories of individual animals to bring readers face to face with the wonder of our fellow beings as well as the suffering they endure and the major paradigm shift that is needed to truly ensure their well being The Animals Agenda will educate and inspire people to rethink how we affect other animals and how we can evolve toward more peaceful and less violent ways of interacting with our animal kin in an increasingly human dominated world
