Global Social Policy Kepa Artaraz, Liz Cunningham, Michael Hill, 2016-06-29 Social policy is a subject that helps develop our understanding of the meaning of human wellbeing and of the systems by which wellbeing must be promoted As a discipline social policy has traditionally been blunted by a focus on the nation state however in this age of globalisation the most pressing challenges such as climate change ageing populations and flagging economies serve as proof that even at national level social policy is now more heavily influenced by global factors than ever before In this important and authoritative text Kepa Artaraz and Michael Hill provide a richly detailed contribution to our understanding of the global forces shaping social problems today Part One discusses the different approaches to social policy and explores the process of globalisation looking particularly at its winners and losers and the implications it has for human well being Part Two examines more closely the key actors in global social policy such as the market the state and international organisations and Part Three provides an opportunity to explore some specific key issues of global importance such as employment and migration demographic change and global poverty Adding considerable momentum to the movement away from a reductionist nationally focused study of the discipline Global Social Policy opens up new and stimulating discussions and provides a fresh framework for the study of human well being Using policy examples from areas around the world to provide a truly international scope it is an essential read for students studying at all levels

Genetically Engineered Crops National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Genetically Engineered Crops: Past Experience and Future Prospects, 2017-01-28 Genetically engineered GE crops were first introduced commercially in the 1990s After two decades of production some groups and individuals remain critical of the technology based on their concerns about possible adverse effects on human health the environment and ethical considerations At the same time others are concerned that the technology is not reaching its potential to improve human health and the environment because of stringent regulations and reduced public funding to develop products offering more benefits to society While the debate about these and other

questions related to the genetic engineering techniques of the first 20 years goes on emerging genetic engineering technologies are adding new complexities to the conversation Genetically Engineered Crops builds on previous related Academies reports published between 1987 and 2010 by undertaking a retrospective examination of the purported positive and adverse effects of GE crops and to anticipate what emerging genetic engineering technologies hold for the future This report indicates where there are uncertainties about the economic agronomic health safety or other impacts of GE crops and food and makes recommendations to fill gaps in safety assessments increase regulatory clarity and improve innovations in and access to GE technology

California Dreaming Lawrence J. McQuillan, 2015-05-01 A politically created crisis of epic proportions is brewing in California and elsewhere across the United States For decades public pension officials and politicians of both parties have promised their employees increasingly generous retirement benefits while low balling the contributions from government agencies and employees that are needed to cover these promises presenting our greatest financial challenge since the Great Depression Pushing the pension liability from today and onto our children and grandchildren leaves them with a depleted future and a potentially bankrupt California State and local governments will scramble to find funds forcing them to raise taxes slash public services and or declare bankruptcy Schools parks emergency services and public employee retirement benefits will be at risk Politicians will defer until circumstances force them to reckon with a disaster of their own making The problem For far too long state and local governments have promised their employees increasingly generous retirement benefits but without ensuring that sufficient funds will be on hand when the pension payments come due In California Dreaming Lawrence J McQuillan pulls back the curtains covering this unfunded liability crisis He describes the true extent of the problem explains the critical factors that are driving public pension debt sky high and exposes the perverse incentives of lawmakers and pension officials that reward them for not fixing the problem and letting it escalate Finally he offers the six crucial reforms needed to restore the financial health of California and other threatened jurisdictions If California Dreaming s roadmap for reform is adopted the prospects for achieving a thriving balanced and equitable future are highly favorable in California and any state or municipality facing its own public pension problem If not the many opportunities that once made the Golden State seem like a Promised Land will quickly evaporate

Arab Dawn Bessma Momani, 2015-11-26 In the West news about the Middle East is dominated by an endless stream of reports and commentary about civil war sectarian violence religious extremism and economic stagnation But do they tell the full story For instance who knew that university enrolment in the war torn Palestinian territories exceeds that of Hong Kong or that more than a third of Lebanese entrepreneurs are women Change is on its way in the Middle East argues Bessma Momani and its cause is demographic Today one in five Arabs is between the ages of fifteen and twenty four Young optimistic and increasingly cosmopolitan their generation will shape the region s future Drawing on interviews surveys and other research conducted with young people in fifteen countries across the Arab world Momani describes the passion for

entrepreneurship reform and equality among Arab youth With insightful political analysis based on the latest statistics and first hand accounts Arab Dawn is an invigorating study of the Arab world and the transformative power of youth Finks Joel Whitney,2017-01-03 When news broke that the CIA had colluded with literary magazines to produce cultural propaganda throughout the Cold War a debate began that has never been resolved The story continues to unfold with the reputations of some of America s best loved literary figures including Peter Matthiessen George Plimpton and Richard Wright tarnished as their work for the intelligence agency has come to light Finks is a tale of two CIAs and how they blurred the line between propaganda and literature One CIA created literary magazines that promoted American and European writers and cultural freedom while the other toppled governments using assassination and censorship as political tools Defenders of the cultural CIA argue that it should have been lauded for boosting interest in the arts and freedom of thought but the two CIAs had the same undercover goals and shared many of the same methods deception subterfuge and intimidation Finks demonstrates how the good versus bad CIA is a false divide and that the cultural Cold Warriors again and again used anti Communism as a lever to spy relentlessly on leftists and indeed writers of all political inclinations and thereby pushed U S democracy a little closer to the Soviet model of the surveillance state p p1 margin 0 0px 0 0px 0 0px 0 0px line height 15 0px font 13 0px Helvetica color 323333 webkit text stroke 323333 p p2 margin 0 0px 0 0px 0 0px 0 0px line height 15 0px font 13 0px Helvetica color 323333 webkit text stroke 323333 min height 16 0px span s1 font kerning none **Epigenetic pathways in**

PTSD: how traumatic experiences leave their signature on the genome Tania L Roth,David M Diamond,Karestan C Koenen,2015-04-14 This research topic focuses on epigenetic components of PTSD Epigenetic mechanisms are a class of molecular mechanisms by which environmental influences including stress can interact with the genome to have long term consequences for brain plasticity and behavior Articles herein include empirical reports and reviews that link stress and trauma with epigenetic alterations in humans and animal models of early or later life stress Themes present throughout the collection include DNA methylation is a useful biomarker of stress and treatment outcome in humans epigenetic programming of stress sensitive physiological systems early in development confers an enhanced risk on disease development upon re exposure to trauma or stress and long lived fear memories are associated with epigenetic alterations in fear memory and extinction brain circuitry *POVERTY, LIVELIHOOD AND ENVIRONMENTAL ISSUES* Ashok Kundu,Amit Kumar Bhandari,Aparajita Dhara,2017-08-01 The linkage between poverty livelihood and the environment is always multifaceted and often complex The degradation of the environment has been plunging millions of people into poverty The last century witnessed rapid progress in the application of science and technology which resulted in improvement in livelihood reduction in poverty enhanced life expectancy and huge growth in consumption which in turn created pressure on the environment Thus the planet s capacity to sustain is eroding with degrading agricultural land shrinking forests diminishing supply of clean water and other related issues Apart from food and water clean and affordable access to energy

is one key issue to a decent livelihood The tradeoffs that policymakers are facing nowadays are rapid reduction in poverty and improving livelihood without harming the environment These draw our focus to address environmental issues that matter to the livelihood of the poor which are critical for poverty reduction Strengthening the link between poverty livelihood and the environment can promote sustainable development outcomes The book is a collection of articles on comprehensive research case studies empirical and theoretical papers on these issues The chapters of the book attempted to analyze the links and identify approaches that can promote positive outcomes The contributors here tried to highlight a number of key challenges that need to be addressed in the process of policy formulation and government investment programmes It may serve as an important resource for academics researchers professionals students and policy makers **Strengthening**

Reah Bravo, 2024-06-18 A brave book that imbues MeToo era discourse with a fresh voice Kate Bolick New York Times bestselling author this is a thoroughly researched and deeply personal examination of how women unintentionally condone workplace abuse and what we can do to change things for the better When Reah Bravo began working at the Charlie Rose show the open secret of Rose s conduct towards women didn t deter her from pursuing a position she thought could launch her career in broadcast journalism She considered herself more than capable of handling any unprofessional behavior that might come her way But she soon learned

a devastating truth we don't always react to abusive situations as we imagine we will. When we live in a society where many feminist ideals are mainstream and women hold positions of power, how is it possible that sexual misconduct remains prevalent? When many employers mandate trainings to prevent harassment of all kinds, why is workplace abuse still so rampant? Weaving her own experience with those of other women and insights from experts, Bravo reveals the psychological and cultural forces that make us all enablers of a sexist and dangerous status quo. At a critical time in the ongoing fight for gender and racial justice, Bravo has written an empathic and concise book that will inspire the next generation of voices courageous enough to rage against the machine. Rebecca Carroll, author of *Surviving the White Gaze* **How Data**

Happened Chris Wiggins, Matthew L. Jones, 2023-03-21. Fascinating! Jill Lepore, *The New Yorker*. A sweeping history of data and its technical, political, and ethical impact on our world. From facial recognition capable of checking people into flights or identifying undocumented residents to automated decision systems that inform who gets loans and who receives bail, each of us moves through a world determined by data empowered algorithms. But these technologies didn't just appear; they are part of a history that goes back centuries, from the census enshrined in the US Constitution to the birth of eugenics in Victorian Britain to the development of Google search. Expanding on the popular course they created at Columbia University, Chris Wiggins and Matthew L. Jones illuminate the ways in which data has long been used as a tool and a weapon in arguing for what is true as well as a means of rearranging or defending power. They explore how data was created and curated as well as how new mathematical and computational techniques developed to contend with that data serve to shape people's ideas, society, military operations, and economies. Although technology and mathematics are at its heart, the story of data ultimately concerns an unstable game among states, corporations, and people. How were new technical and scientific capabilities developed? Who supported, advanced, or funded these capabilities or transitions, and how did they change? Who could do what, from what, and to whom? Wiggins and Jones focus on these questions as they trace data's historical arc and look to the future. By understanding the trajectory of data, where it has been and where it might yet go, Wiggins and Jones argue that we can understand how to bend it to ends that we collectively choose with intentionality and purpose. **Nimble** Baba

Prasad, 2015-04-24. The world today can be best described by one word: turbulence. As change rages all around, how can you, as an individual or as an organization, take advantage of unexpected opportunities and succeed in difficult circumstances? In a book that challenges traditional notions of strategy, Baba Prasad draws on his research at some of the world's best business schools to show how intelligence can help you and your business navigate this maelstrom. *The Intelligence Framework*, presented in *Nimble*, goes beyond the common management concept of agility; it presents an immensely practical and hands-on approach for companies and individuals to develop five kinds of intelligences and apply them in different settings for maximum benefit. Bridging strategy, leadership, and innovation, and with vivid illustrations, *Nimble* provides a path-breaking assessment methodology and a systematic four-step approach that every company and individual can use to lead amid

turbulence The Palgrave Handbook of Digital Russia Studies Daria Gritsenko, Mariëlle Wijermars, Mikhail Kopotev, 2020-12-15 This open access handbook presents a multidisciplinary and multifaceted perspective on how the digital is simultaneously changing Russia and the research methods scholars use to study Russia It provides a critical update on how Russian society politics economy and culture are reconfigured in the context of ubiquitous connectivity and accounts for the political and societal responses to digitalization In addition it answers practical and methodological questions in handling Russian data and a wide array of digital methods The volume makes a timely intervention in our understanding of the changing field of Russian Studies and is an essential guide for scholars advanced undergraduate and graduate students studying Russia today

China and Its Small Neighbors Sung Chull Kim, 2023-03-01 In *China and Its Small Neighbors* Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors part of wider changes in international relations brought about by the rise of China While being critical of the current trend that focuses on the China U S rivalry alone Kim argues that a microanalysis of China s advances toward its neighbors is a guide to understanding the trajectory of China s expanding influence and transitions in world politics more broadly Economic asymmetry as seen in trade concentration non transparency and reliance on bilateral aid has made China s small neighbors vulnerable on the political front thus generating potential threats to their sovereignty and independence Because China has the upper hand in the bilateral relationships these weak states practice dual core hedging as a strategy for survival They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging on Each small state s mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra regional powers

Milton Friedman Jennifer Burns, 2023-11-14 An Economist Best Book of 2023 One of The New York Times 33 Nonfiction Books to Read This Fall Named a most anticipated fall book by the Chicago Tribune and Bloomberg Finalist for the 2024 Hayek Book Prize Wherever you sit on the political spectrum there s a lot to learn from this book More than a biography of one controversial person it s an intellectual history of twentieth century economic thought Greg Rosalesky NPR s Planet Money The first full biography of America s most renowned economist Milton Friedman was alongside John Maynard Keynes the most influential economist of the twentieth century His work was instrumental in the turn toward free markets that defined the 1980s and his full throated defenses of capitalism and freedom resonated with audiences around the world It s no wonder the last decades of the twentieth century have been called the Age of Friedman or that analysts have sought to hold him responsible for both the rising prosperity and the social ills of recent times In *Milton Friedman* the first full biography to employ archival sources the historian Jennifer Burns tells Friedman s extraordinary story with the nuance it deserves She provides lucid and lively context for his groundbreaking work on everything from why dentists earn less than doctors to the vital importance of the money supply to inflation and the limits of government planning and stimulus She traces Friedman s

long standing collaborations with women including the economist Anna Schwartz his complex relationships with powerful figures such as the Federal Reserve chairman Arthur Burns and the Treasury secretary George Shultz and his direct interventions in policymaking at the highest levels Most of all Burns explores Friedman s key role in creating a new economic vision and a modern American conservatism The result is a revelatory biography of America s first neoliberal and perhaps its last great conservative

Green, Closed Loop, Circular Bio-Economy Charisios Achillas,Dionysis Bochtis,2021-03-04 In recent years bioeconomy strategies have been implemented and adapted internationally In the bioeconomy materials are to a certain extent circular by nature However biomaterials may also be used in a rather linear way Lately a transition towards a circular economy a more restorative and regenerative economic model is being promoted worldwide A circular economy offers an alternative model aiming at doing more and better with less It is based on the idea that circulating matter and energy will diminish the need for new input Its concept lies in maintaining the value of products materials and resources for as long as possible and at the same time minimizing or even eliminating the amount of waste produced Focused on closing the loops a circular economy is a practical solution for promoting entrepreneurial sustainability economic growth environmental resilience and a better quality of life for all The most efficient way to close resource loops is to find value in the waste Different modes of resource circulation may be applied e g raw materials by products human resources logistics services waste energy or water To that end this Special Issue seeks to contribute to the circular bioeconomy agenda through enhanced scientific and multidisciplinary knowledge to boost the performance efficiency of circular business models and support decision making within the specific field The Special Issue includes innovative technical developments reviews and case studies all of which are relevant to green closed loop circular bioeconomy

Contracting Freedom Maria L. Quintana,2022-05-10 Contracting Freedom is the first relational study of the origins of twentieth century U S guestworker programs from Mexico and the Caribbean It investigates these government sponsored programs as the unexplored consequence of enslaved labor Japanese American incarceration the New Deal the long civil rights movement and Caribbean decolonization In the World War II era U S lawmakers and activists alike celebrated guestworker agreements with Mexico and the Caribbean as hallmarks of anti imperialism and worker freedom A New Deal based conception of racial liberalism inspired many of these government officials and labor advocates to demand a turn toward state sponsored labor contracts across the hemisphere to protect migrant workers welfare and treatment in the postwar world Their view of liberalism emphasized the value of formal labor contracts bilateral agreements between nation states state power and equal rights all of which they described as advances beyond older labor arrangements forged under colonialism and slavery Eighty years later their conceptions of guestworker programs continue to shape political understandings of the immigration debate as these programs are often considered a solution to offset the deportation regime and as a response to increasingly rigid racist measures to close U S borders to migrants Maria Quintana s compelling history shifts the focus on guestworker programs to

the arena of political conflict revealing how fierce debates over the bracero program and Caribbean contract labor programs extended and legitimated U S racial and imperial domination into the present era It also unearths contract workers emerging visions of social justice that challenged this reproduction of race and empire giving freedom new meanings that must be contemplated

The Roots of Polarization Neil A. O'Brian, 2024-09-25 A deeply researched account of how battles over civil rights in the 1960s shaped today's partisan culture wars In the late twentieth century gay rights immigration gun control and abortion debates all burst onto the political scene scrambling the parties and polarizing the electorate Neil A O Brian traces the origins of today's political divide on these issues to the 1960s when Democrats and Republicans split over civil rights It was this partisan polarization over race he argues that subsequently shaped partisan fault lines on other culture war issues that persist to this day Using public opinion data dating to the 1930s O Brian shows that attitudes about civil rights were already linked with a range of other culture war beliefs decades before the parties split on these issues and much earlier than previous scholarship realized Challenging a common understanding of partisan polarization as an elite led phenomenon The Roots of Polarization argues politicians and interest groups jockeying for power in the changing party system seized on these preexisting connections in the mass public to build the parties contemporary coalitions

Slick Royce Kurmelovs, 2024-07-30 A riveting expose of the global oil industry's multi decade conspiracy to muddy the waters around the science of climate change and use the Australian government to undermine worldwide efforts to address environmental devastation Researched and written by one of Australia's most fearless investigative journalists Slick reveals how the US petroleum industry was warned about its environmental impacts back in the 1950s and yet went on to build the Australian oil industry which in turn tried to drill the Great Barrier Reef sought to strongarm governments and joined a global effort to bury the science of climate change and delay action despite knowing the harms it would cause Slick also tells the stories of fire and flood survivors as well as of the activists engaged in a high risk fight for the future of Australia and of the efforts being made to save ourselves from catastrophe In this superb in depth work of journalism Royce Kurmelovs provides an on the ground examination of how the fossil fuel industry captured Australia and outlines what's at stake for the survival of the planet and our democracy
