Women in Wildlife Science Carol L. Chambers, Kerry L. Nicholson, 2022-11 This practical guide an edited volume discusses the important topic of fostering diversity in wildlife conservation and management      The Future of the Professions Richard Susskind, Daniel Susskind, 2022-03-31 This book predicts the decline of today s professions and introduces the people and systems that will replace them In an internet enhanced society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction The authors challenge the grand bargain the arrangement that grants various monopolies to today s professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks With a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions Illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century      **Chemical Control** Michael Crowley, 2016-01-26 This thoroughly researched study highlights the international community s failure to regulate contemporary state research development marketing and or deployment of riot control agents and incapacitating chemical agent weapons      *Yearbook of International Organizations 2014-2015 (Volume 4)* Union Of International Associations, Union of International Associations, 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations      *Microplastics in the Marine Environment: Sources, Distribution, Biological Effects and Socio-Economic Impacts* André Ricardo Araújo Lima, Juliana Assunção Ivar do Sul, João P. G. L. Frias, Cristina Panti, 2021-06-09      *But Will It Fly?* Iver P. Cooper, 2025-09-17

Conventional aircraft today are propelled by the action of propellers or jets and powered by the internal combustion of petroleum fuels in piston turboprop or jet engines. But other power sources, powerplants and propulsion devices for airships as well as aircraft have been proposed and even experimented with over the last few centuries. The power sources considered include human muscles, steam, batteries, nuclear reactors, and hydrogen fuel, and the propulsion devices include sails, oars, flapping wings, rockets, and cycloidal propellers. This meticulously researched book presents the history of these unconventional aerial power and propulsion systems, explains the underlying science and technology behind them, and assesses the crucial question of practicality.

**The One Percent Solution** Gordon Lafer, 2017-04-04 In the aftermath of the 2010 Citizens United decision, it has become commonplace to note the growing political dominance of a small segment of the economic elite. But what exactly are those members of the elite doing with their newfound influence? The One Percent Solution provides an answer to this question for the first time. Gordon Lafer's book is a comprehensive account of legislation promoted by the nation's biggest corporate lobbies across all fifty state legislatures and encompassing a wide range of labor and economic policies. In an era of growing economic insecurity, it turns out that one of the main reasons life is becoming harder for American workers is a relentless and concerted offensive by the country's best-funded and most powerful political forces: corporate lobbies empowered by the Supreme Court to influence legislative outcomes with an endless supply of cash. These actors have successfully championed hundreds of new laws that lower wages, eliminate paid sick leave, undo the right to sue over job discrimination, and cut essential public services. Lafer shows how corporate strategies have been shaped by twenty-first-century conditions, including globalization, economic decline, and the populism reflected in both the Trump and Sanders campaigns of 2016. Perhaps most important, Lafer shows that the corporate legislative agenda has come to endanger the scope of democracy itself. For anyone who wants to know what to expect from corporate-backed Republican leadership in Washington, D.C., there is no better guide than this record of what the same set of actors has been doing in the state

legislatures under its control.

**L.A.'s Titans of Temple Street** Tom Sitton, 2023-03-29 This book studies Los Angeles County and its government since World War II. A special focus is given to the Titans of Temple Street, the five-member Board of Supervisors that determines policies and actions for many issues throughout the county, especially for residents who do not live in the county's 88 cities. It is the largest of all U.S. counties with a population of more than 10 million, more residents than 41 states, and an annual budget of more than 44 billion, more than all but 19 states. It has served as an innovative example of county government since the early 1900s.

*National Security, Democracy, & Good Governance in Post-Military Rule Nigeria, Volume One* Dr. Dan Mou, 2016-12-30 This book shows that the security, economic, political, and social problems challenging national security, democracy, and good governance currently in Nigeria would get better or worse depending on what happens to the seventy-one percent (71%) of Nigeria's population still living below the poverty line. This is in spite of the billions of petrodollars that Nigeria garnered as revenue over the past few decades. It reveals that one does not need to be a

political prophet to predict that if these challenges are not successfully addressed through good governance and inclusive growth this country will witness the worst civil disobedience violence revolts militancy breakdown of law and order more kidnappings and more of the citizens trying to check out of the country to other parts of the world in future It concludes however that under such intense pressures the Government of Nigeria even if it is simply for its self preservation will be forced by the objective conditions to move against the interests of the dominant groups and classes in Nigeria These are the ones who have for long captured and hijacked state power and the resources of the country for their exclusive use Teach Janice Koch,2019-01-02 Teach is a concise introduction to education that challenges students preconceived notions of teaching in order to transform them into reflective practitioners Empathizing with the difficulties students face as they move from the college classroom to their own classrooms revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession making the philosophy of teaching and learning accessible and relevant The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field while also including the Interstate Teacher Assessment and Support Consortium InTASC standards correlating with each chapter s content With the guidance of this supportive text students will gain vital exposure by engaging with professional standards from the very start of their career *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1968 First multi year cumulation covers six years 1965 70 **Network World** ,2001-03-12 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce *A Nation of Neighborhoods* Benjamin Looker,2015-10-22 Benjamin Looker investigates the cultural social and economic complexities of the idea of neighborhood in postwar America In the face of urban decline competing visions of the city neighborhood s significance and purpose became proxies for broader debates over the meaning and limits of American democracy Looker examines radically different neighborhood visions by urban artists critics writers and activists to show how sociological debates over what neighborhood values resonated in art political discourse and popular culture The neighborhood both the epitome of urban life and in its insularity an escape from it was where twentieth century urban Americans worked out solutions to tensions between atomization or overcrowding harsh segregation or stifling statism ethnic assimilation or cultural fragmentation **Profiles in Ignorance** Andy Borowitz,2022-09-13 NEW YORK TIMES BESTSELLER WALL STREET JOURNAL BESTSELLER WASHINGTON POST BESTSELLER Andy Borowitz one of the funniest people in America CBS Sunday Morning brilliantly chronicles our embrace of anti intellectualism Walter Isaacson in American politics from Ronald Reagan to Dan Quayle from George W Bush to Sarah Palin to its apotheosis in Donald J Trump Andy Borowitz has

been called a Swiftian satirist The Wall Street Journal and one of the country's finest satirists The New York Times Millions of fans and New Yorker readers enjoy his satirical news column The Borowitz Report Now in Profiles in Ignorance he delivers a wittily alarming polemic that tracks the evolution of American politics from grounds for gravitas to festival of idiocy The New York Times Borowitz argues that over the past fifty years American politicians have grown increasingly allergic to knowledge and mass media have encouraged the election of ignoramuses by elevating candidates who are better at performing than thinking Starting with Ronald Reagan's first campaign for governor of California in 1966 and culminating with the election of Donald J Trump to the White House Borowitz shows how during the age of twenty four hour news and social media the US has elected politicians to positions of great power whose lack of the most basic information is terrifying In addition to Reagan Quayle Bush Palin and Trump Borowitz covers a host of congresspersons senators and governors who have helped lower the bar over the past five decades Profiles in Ignorance aims to make us both laugh and cry laugh at the idiotic antics of these public figures and cry at the cataclysms these icons of ignorance have caused But most importantly the book delivers a call to action and a cause for optimism History doesn't move in a straight line and we can change course if we act now

**The Rocket Lab** Michael G. Smith, 2023-05-15 The Rocket Lab Maurice Zucrow Purdue University and America's Race to Space focuses on the golden era of space exploration between 1946 and 1966 specifically the life and times of Purdue University's Dr Maurice J Zucrow a pioneering teacher and researcher in aerospace engineering Zucrow taught America's first university

course in jet and rocket propulsion wrote the field's first textbook and established the country's first educational Rocket Lab. He was part of a small circle of innovators who transformed Purdue into the country's largest engineering university which became a cradle of astronauts. Taking a chronological and thematic approach, *The Rocket Lab* weaves between the local and national drawing in rival universities especially Harvard, MIT, Princeton and Caltech. Also covered is Zucrow's role in the national project system of research and development through World War II and the Cold War. At Aerojet he was one of the country's original project engineers dedicated to scientific technical expertise and the stepwise approach. He made vanguard power plant contributions to the Northrop Flying Wing as well as the Corporal Nike and Atlas missiles among others. Zucrow's work in propulsion helped to improve the country's arsenal of ballistic missiles and space launchers and as a teacher he educated the first generation of aerospace engineers. This book elevates Zucrow and the central role he played in getting the United States to space.

**Hubert Harrison** Jeffrey B. Perry, 2020-12-22. The St. Croix born Harlem based Hubert Harrison (1883-1927) was a brilliant writer, orator, educator, critic, and activist who combined class consciousness and anti-white supremacist race consciousness into a potent political radicalism. Harrison's ideas profoundly influenced New Negro militants including A. Philip Randolph and Marcus Garvey, and his work is a key link in the two great strands of the Civil Rights Black Liberation struggle: the labor and civil rights movement associated with Randolph and Martin Luther King Jr. and the race and nationalist movement associated with Garvey and Malcolm X. In this second volume of his acclaimed biography, Jeffrey B. Perry traces the final decade of Harrison's life from 1918 to 1927. Perry details Harrison's literary and political activities, foregrounding his efforts against white supremacy and for racial consciousness and unity in struggles for equality and radical social change. The book explores Harrison's role in the militant New Negro Movement and the International Colored Unity League, as well as his prolific work as a writer, educator, and editor of the *New Negro* and the *Negro World*. Perry examines Harrison's interactions with major figures such as Garvey, Randolph, J. A. Rogers, Arthur Schomburg, and other prominent individuals and organizations as he agitated, educated, and organized for democracy and equality from a race-conscious, radical internationalist perspective. This magisterial biography demonstrates how Harrison's life and work continue to offer profound insights on race, class, religion, immigration, war, democracy, and social change in America.
