The Market and Other Orders F. A. Hayek, 2022-12-22 In addition to his groundbreaking contributions to pure economic theory F A Hayek also closely examined the ways in which the knowledge of many individual market participants could culminate in an overall order of economic activity His attempts to come to terms with the knowledge problem thread through his career and comprise the writings collected in the fifteenth volume of the University of Chicago Press s Collected Works of F A Hayek series The Market and Other Orders brings together more than twenty works spanning almost forty years that consider this question Consisting of speeches essays and lectures including Hayek s 1974 Nobel lecture The Pretense of Knowledge the works in this volume draw on a broad range of perspectives including the philosophy of science the physiology of the brain legal theory and political philosophy Taking readers from Hayek s early development of the idea of spontaneous order in economics through his integration of this insight into political theory and other disciplines the book culminates with Hayek s integration of his work on these topics into an overarching social theory that accounts for spontaneous order in the variety of complex systems that Hayek studied throughout his career Edited by renowned Hayek scholar Bruce Caldwell who also contributes a masterly introduction that provides biographical and historical context The Market and Other Orders forms the definitive compilation of Hayek s work on spontaneous order

Partners in Science Robert E. Kohler, 2020-02-22 Robert Kohler shows exactly how entrepreneurial academic scientists became intimate partners in science with the officers of the large foundations created by John D Rockefeller and Andrew Carnegie and in so doing tells a fascinating story of how the modern system of grant getting and grant giving evolved and how this funding process has changed the way laboratory scientists make their careers and do their work This book is a rich historical tapestry of people institutions and scientific ideas It will stand for a long time as a source of precise and detailed information about an important aspect of the scientific enterprise It also contains many valuable lessons for the coming years John Ziman Times Higher Education Supplement

Parliament. House of Lords. Science and Technology Committee, Bernan, 2008 Waste Reduction 6th report of session 2007 08 Vol 2 Evidence The Priesthood of Science William Leiss, 2008-05-10 The global political situation is increasingly volatile and Hera and her sisters are sealed off from the rest of the world in southern Nevada She is still tormented by her parents decision to genetically modify the brains of their twelve daughters and by her own agreement to allow a similar procedure to be used on a much larger group of human embryos That group of engineered embryos has become one thousand young people just turning eighteen and the gender politics among them is threatening to ruin Hera s gamble on a new beginning for human society The Priesthood of Science envisions a future in which scientific research is confined to facilities hidden away from public view and where there is a prohibition against turning scientific discoveries into new technologies in order to keep a world torn apart by religious fanaticism and ethnic hatred under control Published in English **The Saturday Review of Politics, Literature, Science and Art** , 1889 *Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c* , 1831 *The Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c* , 1831 **God and Gaia** Michael S Northcott, 2022-12-22 God and Gaia explores the overlap between traditional religious cosmologies and the scientific Gaia theory of James Lovelock It argues that a Gaian approach to the ecological crisis involves rebalancing human and more than human influences on Earth by reviving the ecological agency of local and indigenous human communities and of nonhuman beings Present day human ecological influences on Earth have been growing at pace since the Scientific and Industrial Revolutions when modern humans adopted a machine cosmology in which humans are the sole intelligent agency The resultant imbalance between human and Earthly agencies is degrading the species diversity of ecosystems causing local climate changes and threatens to destabilise the Earth as a System Across eight chapters this ambitious text engages with traditional cosmologies from the Indian Vedas and classical Greece to Medieval Christianity with case material from Southeast Asia Southern Africa and Great Britain It discusses concepts such as deep time and ancestral time the ethics of genetic engineering of foods and viruses and holistic ecological management Northcott argues that an ontological turn that honours the differential agency of indigenous humans and other kind and that draws on sacred traditions will make it possible to repair the destabilising impacts of contemporary human activities on the Earth System and its constituent ecosystems This book will be of considerable interest
