Paper and Light Julian Brooks, Michelle Sullivan, 2024-10-29. This volume looks at the techniques and materials that artists have utilized since the Renaissance to create spectacular light effects in drawings. The treatment of light and shadow is one of the building blocks of drawing. From techniques such as highlights and reserves to material selection and the creation of translucent tracing paper to the use of light as a medium for viewing artworks, artists for hundreds of years have found innovative and dazzling ways to create light on a sheet of paper. This publication examines the central relationship between paper and light in the world of drawings in western European art from the Renaissance to the twentieth century. Focusing on drawings from the collection of the J. Paul Getty Museum as well as works from the British Museum, Musée du Louvre and others, and featuring masterful

works by such artists as Parmigianino Leonardo da Vinci Nicolas Poussin Odilon Redon Edgar Degas and Georges Seurat Paper and Light will entice readers to look longer and more closely at drawings deriving an even deeper appreciation for the skill and labor that went into them *Kuhn's Structure of Scientific Revolutions at Fifty* Robert J.
