*Teaching and Learning in a Digital World* Michael E. Auer, David Guralnick, Istvan Simonics, 2017-12-26 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27-29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education. To face these current real world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

*Mixed Messages* Stefanie Mollborn, 2017 Sex is bad. Unprotected sex is a problem. Having a baby would be a disaster. Abortion is a sin. Teenagers in the United States hear conflicting messages about sex from everyone around them. How do teens understand these messages? In *Mixed Messages*, Stefanie Mollborn examines how social norms and social control work through in-depth interviews with college students and teen mothers and fathers, revealing the tough conversations teenagers just can't have with adults. Delving into teenagers' complicated social worlds, Mollborn argues that by creating informal social sanctions like gossip and exclusion and formal communication such as sex education, families, peers, schools, and communities strategize to gain control over teens' behaviors. However, while teens strategize to keep control, they resist the constraints of the norms, revealing the variety of outcomes that occur beyond compliance or deviance. By showing that the norms existing today around teen sex are ineffective, failing to regulate sexual behavior and instead punishing teens that violate them, Mollborn calls for a more thoughtful and consistent dialogue between teens and adults, emphasizing messages that will lead to more positive health outcomes.

**Children's Active Transportation** Richard Larouche, 2018-06-15 Children's Active Transportation is a rigorous and comprehensive examination of the current research and interventions on active transportation for children and youth. As the travel behaviors of these groups tend to be highly routinized and their mobility faces unique constraints such as parental restrictions, mandatory school attendance, and the inability to drive a motor vehicle before late adolescence, this book examines the key factors that influence travel behavior among children and youth, providing key insights into lessons learned from current interventions. Readers will find a resource that clearly demonstrates how critical it is for children to develop strong active transportation habits that carry into adulthood. Discusses the correlates that exist between children's active transportation using a social and ecological model. Summarizes active transportation interventions that show what works to increase non-motorized modes of travel in children. Describes the factors that influence the implementation and effectiveness of interventions.

The Complexity of Religious Inequality Melissa Wilde, 2021-04-27 Although scholars of religion acknowledge religion's deep interconnectedness with race and ethnicity, and occasionally class, we nonetheless typically study religion as a factor that is independent from other social structures. Likewise, we rarely systematically examine class, race, or gender differences between or within religious groups. This journal issue will highlight research that moves beyond these weaknesses by publishing papers that intentionally examine aspects of inequality as they relate to religion. Papers that explore these connections historically or in contemporary times, and internationally or locally, are all encouraged.

**Radical Realism, Autofictional Narratives and the Reinvention of the Novel** Fiona J. Doloughan, 2023-02-14 This monograph treats modes of fictionality in contemporary auto biography, memoir, and autofiction. Adopting a case study approach, it demonstrates the extent to which contexts of production and reception are important in framing generic expectations with respect to the representation of lived experience and in helping to determine the status of the narrator as fictional persona or implied author.
