Substance Abuse And The New Road To Recovery Glenn D. Walters, 2014-06-03 Substance misuse is one of the more common yet baffling problems confronting the practising mental health professional today The issues involved in the misuse of substances can be so complex that some practitioners are inclined to avoid working with clients who have been diagnosed with a drug abuse problem This new guidebook is designed to assist clinicians with the task of conceptualizing understanding and intervening with persons who abuse substances It accomplishes this by offering practical suggestions assessment procedures and change strategies directed at the thoughts feelings and behaviours believed to support a drug lifestyle Although the approach described in this book utilizes a number of cognitive behavioural techniques the approach is unique in the sense that it also deals with the fear of change that frequently interferes with a client's ability to benefit from therapy It also considers change strategies used by people who have escaped from a drug lifestyle without any type of treatment or formal intervention Momentarily arresting the lifestyle is the first step of intervention This is followed by skill development in which the conditions choices and cognitions associated with a drug lifestyle are targeted for intervention and change In the final phase of this approach the client is engaged in the resocialization process whereby he or she is encouraged to develop ways of thinking and behaving that are incompatible with continued misuse of psychoactive substances The end result is a concise yet comprehensive examination of ways clinicians might facilitate change in persons previously committed to a drug lifestyle *Whose History Counts* June Bam, Lungisile Ntsebeza, Allan Zinn, 2018-11-29 Originally planned as a fact based book on the pre colonial history of the Eastern Cape in the true tradition of history this ground breaking book focuses on epistemological and foundational questions about the writing of history and whose history counts *Whose History Counts* challenges the very concept of the pre coloniale and explores methodologies on researching and writing history *Annual Report South Africa*. Arbuckle,1996-01-10 Formation is a rite of passage or initiation ritual This book draws on the findings of social anthropological studies of initiation rituals and contemporary biblical studies of rites of passage Since initiation rituals are of critical importance in the life journeys of individuals and groups the book s central theme is relevant to educationalists and ritual leaders in the Church and secular society Most religious congregations founded since the thirteenth century were formed for prophetic ministry to a world in change yet for centuries before Vatican II their candidates were rarely trained explicitly for this task Through years of quasi indoctrination and voluntary incarceration they were taught in a monastic atmosphere of unchanging order that the world was evil and to be avoided Conformity to a theological ecclesiastical and pastoral status quo was the most esteemed value in a candidate This emphasis was contrary to the very nature of active religious life Religious must be prophetic challengers of the status quo within the Church and society Training for membership in active religious congregations therefore must now be radically reformed but there are no road maps available to direct educationalists in developing programmes that would stimulate candidates to be radically creative in ministry From Chaos to Mission creates a framework for radical thinking and practical action about the critical issue of formation of religious for mission today **FET Colleges** South Africa. Stamatel, 2020-11-04 A thorough and timely investigation of both well established and emerging crime and punishment issues

this book provides readers with compelling examples of how different countries around the world confront these problems. This book offers a detailed look at 10 hot topics in crime and punishment that are shared by many countries. Some of these topics are well established within the field of criminology such as patterns of criminal behavior, juvenile delinquency, drug trafficking, policing, and punishment; others are emerging topics that have not been well studied across a variety of countries such as violence against women, hate crimes, and gun control. Within each topic, the book explores how eight countries experience the issue, highlighting similarities across different places as well as unique treatments of the problem. The chapter on punishment addresses the widespread use of incarceration as criminal punishment but also considers different philosophies with respect to the purpose of incarceration and whether or not this strategy is effective in the face of large scale criminal events such as mass atrocities. The country narratives provide historical context for understanding the particular crime or punishment issue, current trends, and relevant statistical data for describing the extent of the issue and changes over time, in addition to contemporary examples of the issue.
