Chemistry Education and Contributions from History and Philosophy of Science Mansoor Niaz, 2015-12-23 This book explores the relationship between the content of chemistry education and the history and philosophy of science HPS framework that underlies such education It discusses the need to present an image that reflects how chemistry developed and progresses It proposes that chemistry should be taught the way it is practiced by chemists as a human enterprise at the interface of scientific practice and HPS Finally it sets out to convince teachers to go beyond the traditional classroom practice and explore new teaching strategies The importance of HPS has been recognized for the science curriculum since the middle of the 20th century The need for teaching chemistry within a historical context is not difficult to understand as HPS is not far below the surface in any science classroom A review of the literature shows that the traditional chemistry classroom curricula and textbooks while dealing with concepts such as law theory model explanation hypothesis observation

Groundwork David Young Kim, 2022-10-18 An illuminating look at a fundamental yet understudied aspect of Italian Renaissance painting

The Italian Renaissance picture is renowned for its depiction of the human figure from the dramatic foreshortening of the body to create depth to the subtle blending of tones and colors to achieve greater naturalism. Yet these techniques rely on a powerful compositional element that often goes overlooked. *Groundwork* provides the first in-depth examination of the complex relationship between figure and ground in Renaissance painting. Ground can refer to the preparation of a work's surface, the fictive floor or plane, or the background on which figuration occurs. In laying the material foundation, artists perform groundwork, opening the ground as a zone that can precede, penetrate, or fracture the figure. David Young Kim looks at the work of Gentile da Fabriano, Giovanni Bellini, Giovanni Battista Moroni, and Caravaggio, reconstructing each painter's methods to demonstrate the intricacies involved in laying ground layers whose translucency and polychromy permeate the surface. He charts significant transitions from gold ground painting in the Trecento to the darkened grounds in Baroque tenebrism and offers close readings of period texts to shed new light on the significance of ground forms such as rock, face, wall, and cave. This beautifully illustrated book reconceives the Renaissance picture, revealing the passion and mystery of groundwork and discovering figuration beyond the human figure.
